

WEST VIRGINIA CODE: §16-46-5

§16-46-5. Licensed health care providers limited liability related to opioid antagonist prescriptions.

(a) A licensed health care provider who is permitted by law to prescribe drugs, including opioid antagonists, may, if acting in good faith, prescribe and subsequently dispense or distribute an opioid antagonist without being subject to civil liability or criminal prosecution unless prescribing the opioid antagonist was the result of the licensed health care providers gross negligence or willful misconduct.

(b) For purposes of this chapter and chapter sixty-a of this code, any prescription written, as described in section three of this article, shall be presumed as being issued for a legitimate medical purpose in the usual course of professional practice unless the presumption is rebutted by a preponderance of the evidence.

(c) Any person who possesses an opioid antagonist and administers it to a person whom they believe to be suffering from an opioid-related overdose and who is acting in good faith is not, as a result of his or her actions or omissions, subject to criminal prosecution arising from the possession of an opioid antagonist or subject to any civil liability with respect to the administration of or failure to administer the opioid antagonist unless the act or failure to act was the result of gross negligence or willful misconduct.

(d) Any person who administers an opioid antagonist to a person whom they believe to be suffering from an opioid-related overdose is required to seek additional medical treatment at a medical facility for that person immediately following the administration of the opioid antagonist to avoid further complications as a result of suspected opioid-related overdose.

(e) Any pharmacist or pharmacy intern who dispenses or refuses to dispense an opioid antagonist under the provisions of this article who is acting in good faith and subject to the requirements of section three-a of this article is not, as a result of his or her actions or omissions, subject to civil liability or criminal prosecution unless dispensing the opioid antagonist was the result of the pharmacist or pharmacy interns gross negligence or willful misconduct.
