WEST VIRGINIA CODE: §17-25-1

§17-25-1. Legislative finding.

The Legislature hereby finds that the continued and future success of the coal industry is greatly dependent upon a quality network of roads and highways. Critical market forces make it imperative for such a road system to be constructed and maintained. It is the responsibility of the state and all industry to form a partnership to accomplish this goal. "Industrial roads," for the purposes of this article, may be construed to include a single bridge or combination of bridges.
