

WEST VIRGINIA CODE: §17-2E-1

§17-2E-1. Legislative findings.

- (a) The Legislature finds that it is in the public interest to accommodate telecommunications facilities on Division of Highways right-of-way when the use of the right-of-way does not adversely affect the safety of the traveling public or impair the highway or its aesthetic quality or conflict with any federal, state, or local laws, rules, regulations, or policies.
- (b) The Legislature further finds that a broadband connection is an essential part of developing the state and local economies, enhancing the transportation system and creating a safer and more secure environment for our citizens.
- (c) The Legislature further finds that expanding telecommunication facilities will allow the state to participate in the E-Rate Program of funding for digital education in America to provide reliable services opportunities for education and training.
- (d) The Legislature further finds that fast, reliable broadband connections enhance telemedical opportunities for our rural doctors and hospitals, linking them to our major medical centers. Thereby overcoming distance barriers, and improving access to medical services that often are not consistently available in rural communities.
- (e) The Legislature further finds that instituting a dig once policy encourages telecommunications carriers to coordinate installation of broadband conduit to minimize costs to the carriers and minimize disruption and inconvenience to the traveling public.
