

# **WEST VIRGINIA CODE: §18-2E-13**

## **§18-2E-13. Establishment of vocational math class.**

(a) Legislative findings and purpose. - The Legislature find that empowering students to enter the trades is of paramount importance. Restructuring current math programming to assist students for a career in the trades is the best way to achieve this goal. The restructuring of the technical transition math class to help students with workforce math will provide students with the opportunity to prepare themselves for a career in the trades.

(b) Enactment. - There is hereby established for all public-school curriculum in West Virginia a technical transition math class geared towards students interested in careers in the trades. This class will pertain to math curriculum in the fields of fractions, conversion from fractions to decimals, application of measurement, reading blueprints, geometry pertaining to workforce math and other math skills needed to succeed in the trades.

(c) Qualifications. - In order to be able to teach this class, an instructor must meet the same qualifications as needed to teach current trade classes and specific content in the public schools. Students shall be eligible for this class once entering high school. This class can be taken as a personalized math credit to meet graduation requirements.
