

---

**WEST VIRGINIA CODE CHAPTER 18**  
**ARTICLE 2E**

WV Legislature

**§18-2E-1. Legislative purpose.**

The purpose of this article is to provide for the establishment of high quality educational standards, to provide for the evaluation of student progress in attaining the knowledge and skills essential for them to become productive members of society, and to provide assurances to the public that a thorough and efficient system of education is being provided for all public school children in West Virginia.

WV Legislature

**§18-2E-1a. Standards, assessment and accountability programs; duties of the state board.**

(a) Prior to adoption or revision of academic standards in mathematics, English language arts, science and social studies, the state board shall constructively engage with the legislative oversight commission on education accountability as outlined in subsection (b). Prior to adoption of a new statewide summative assessment, the state board shall constructively engage with the legislative oversight commission on education accountability on the assessment program it intends to adopt to measure the progress of public school students in attaining a high quality education. Prior to the full implementation of a new accountability system, state board shall develop and recommend to the legislative oversight commission on education accountability an accountability program to help ensure a thorough and efficient system of schools. In developing the standards, assessment program and the accountability program, the state board shall take into consideration recommendations arising from any legislative interim study undertaken at the direction of the joint committee on government and finance and also shall take into consideration any recommendations made by the legislative oversight commission on education accountability.

(b) As part of their on-going responsibility for developing and implementing a program of standards, assessments and a program of accountability, the state board:

- (1) Is prohibited from implementing the Common Core academic standards;
- (2) Shall allow West Virginia educators the opportunity to participate in the development of the academic standards;
- (3) Shall provide by rule for a cyclical review, by West Virginia educators, of any academic standards that are proposed by the state board;
- (4) Shall review assessment tools, including tests of student performance and measures of school and school system performance, and determine when any improvements or additions are necessary;
- (5) Shall consider multiple assessments, including, but not limited to, a state testing program developed in conjunction with the state's professional educators with assistance from such knowledgeable consultants as may be necessary, which may include criterion referenced tests;
- (6) Is prohibited from adopting the Smarter Balanced Assessment system or the PARCC assessment system as the statewide summative assessment;
- (7) Shall review all accountability measures, such as the accreditation and personnel evaluation systems and consider any improvements or additions deemed necessary; and
- (8) Shall ensure that all statewide assessments of student performance are secure.

(c) The state board shall not adopt any national or regional testing program tied to federal funding, or national or regional academic standards tied to federal funding, without oversight by the legislative oversight commission on education accountability.

WV Legislature

**§18-2E-2. National assessment of educational progress program testing.**

Beginning in the school year one thousand nine hundred ninety--ninety-one, and continuing thereafter, national assessment of educational progress program tests shall be administered in academic areas at the various grades designated by the national assessment of educational progress officials to provide comparisons of West Virginia students to a national sample.

Acts, 1996 Reg. Sess., Ch. 114.

WV Legislature

**§18-2E-3a. Honors and advanced placement programs.**

(a) The purpose of this section is to provide honors and advanced placement programs to meet the needs of students who have the potential and desire to complete curriculum more demanding than that offered in the regular classroom for their current grade level. Honors programs are those programs offering courses to expand the academic content in a given program of study and may include but shall not be limited to research and in-depth studies, mentorships, content-focused seminars, and extended learning outcomes instruction in the content area. Advanced placement programs are those programs offering classes which are advanced in terms of content and performance expectations of those normally available for the age/grade level of the student and providing credit toward graduation and possible college credit. Advanced placement classes also include those recognized or offered by the college board, postsecondary institutions and other recognized foundations, corporations or institutions.

Curriculum approved under this section shall be designed to advance the achievement of students in the subject area or areas in which the student has achieved at least two of the following three criteria: (a) Demonstrated exceptional ability and interest through past performance, (b) obtained the prerequisite knowledge and skills to perform honors or advanced placement work, and (c) recommended by the student's former or present teachers. Honors and advanced placement curriculum may include advanced placement courses offered through the college board or other public or private foundations, corporations, institutions, or businesses whose courses are generally accepted as leading to advanced placement or standing in a postsecondary institution, accelerated instructional courses offered via satellite and other courses and arrangements, approved by the state board, which provide students an opportunity to advance their learning above that offered through the regular curriculum. To the maximum extent possible, honors and advanced placement courses shall be taught by a regular classroom teacher. Such classroom teacher shall have adequate knowledge in the subject area for the instruction of such course. If a teacher, licensed by the state board, with adequate knowledge in the advanced subject area is not available, an adjunct teacher or other qualified person may be employed, contracted for, or shared between schools to instruct such course: Provided, That the position shall be posted annually prior to the beginning of the school year immediately following the school year in which the adjunct teacher or other qualified person is employed. The state board may grant waivers to existing certification requirements for an adjunct teacher or other qualified person who has an earned bachelors degree and has demonstrated competence in the subject to be taught.

(b) The honors and advanced placement curriculum shall be phased-in in accordance with the following schedule:

(1) Prior to June 1, 1989, the state board shall establish a program coordinated through the colleges and universities or some other entity, to provide training to teachers in the instruction of honors and advanced placement courses: Provided, That the state board shall not establish an additional certification area for the teaching of honors or advanced

placement courses.

(2) To assist in the implementation of teacher training for honors and advanced placement instruction, there shall be an appropriation to the state board;

(3) On or before June 1, 1989, and each year thereafter, teachers shall be selected to teach honors and advanced placement courses based upon the teacher's qualifications and academic interests and the needs of the students. The county boards of education shall, if necessary, make arrangements for the teachers to attend a training program;

(4) Beginning in the school year 1990-91, each county board shall provide in grades nine through twelve honors and advanced placement courses as provided under subsection (a) of this section.

(c) The state board shall designate one employee who is an expert in the area of higher education financial aid, including, but not limited to, loans, grants and work studies, to work on a full-time continuous basis with high school counselors to ensure that all high school students are informed of the availability of financial assistance to attend college.

**§18-2E-3b. Placement advisory committee established.**

Gifted students in grades nine through twelve may be served in honors and advanced placement programs as described in section three of this article, pursuant to the student's individualized education program and set forth in the student's four year education plan. Prior to the end of grade eight, a placement advisory committee shall convene for the purpose of determining whether a student should be placed in an honors or advanced placement program pursuant to the placement criteria set forth in section three-a of this article. Upon a determination that placement in one of the programs would be appropriate, the placement advisory committee shall write a four year education plan which will designate honors or advanced placement courses and/or offerings appropriate and agreed to by the school, parent and student.

The four year education plan must be reviewed annually and approved by the parent, student and school. Schools shall be required to deliver the individualized education program as stated in the four year education plan.

WV Legislature

**§18-2E-3f. Building the basics early childhood curriculum; legislative findings; state board rule.**

(a) Legislative findings. -- The Legislature makes the following findings:

(1) Children entering early childhood education programs have significant differences in their cognitive development, mastery of the early basic skills and readiness for instruction in a formal setting;

(2) Mastery of the basic skills of reading, mathematics and English language arts is the foundation for all further learning and, therefore, providing the instruction necessary for each child to attain mastery in these basic skills must be the priority for early childhood education programs;

(3) Deficiencies in the basic skills of reading, mathematics and English language arts that persist in children beyond the early childhood years become more difficult to overcome as they retard further progress in building the basics and lead to significant gaps in the basic knowledge needed to comprehend more advanced content in other subject areas; and

(4) Intensive instruction, early detection and intervention to correct student deficiencies in the basic skills of reading, mathematics and English language arts during early childhood education are more effective strategies for improving student performance than the alternatives such as grade level retention, social promotion and referral for special services and can lessen the prevalence of low basic skills as a contributing factor in student truancy, delinquency and dropout rates.

(b) Intent and purpose. -- The intent and purpose of this section is to establish the priority for early childhood education to provide intensive instruction in the basic skills of reading, mathematics and English language arts, along with early detection and intervention strategies to correct student deficiencies, to address the findings of this section.

(c) State board rule. -- On or before July 1, 2004, the state board shall adopt rules to effectuate the intent and purpose of this section, including, but not limited to, provisions that address the following:

(1) Reading, mathematics and English language arts are the only subjects that are required to be taught daily in kindergarten through grade two early childhood education programs;

(2) Instruction in other subject matter in kindergarten through grade two shall be oriented to reinforce instruction in reading, mathematics and English language arts;

(3) Strategies for the early detection and intervention to correct student deficiencies in reading, mathematics and English language arts shall be employed throughout the instructional term in each of the early childhood grades to help students achieve mastery in these subjects, including allowing flexibility in student schedules to provide additional time and instruction for students who are below mastery in these subjects in grades three and

four;

(4) Accountability for student performance on the statewide assessment of student performance in the early childhood grades shall only include the basic skills of reading, mathematics and English language arts; and

(5) Any other provisions considered necessary by the state board to achieve the intent and purpose of this section.

Acts, 2016 Reg. Sess., Ch. 88

WV Legislature

**§18-2E-4. Better schools accountability; school, school district and statewide school report cards.**

(a) For the purpose of providing information to the parents of public school children and the general public on the quality of education in the public schools which is uniform and comparable between schools within and among the various school districts, the state board shall provide a uniform format for school, school district and statewide school report cards and shall promulgate rules concerning the collection and reporting of data and the preparation of report cards under this section. The format shall provide for brief, concise reporting in nontechnical language of required information. Any technical or explanatory material a county board wishes to include shall be contained in a separate appendix available upon request.

(b) The school report cards shall include information as prescribed in this section to give the parents of students at the school and the general public an indication of the quality of education at the school and other programs supportive of community needs, including, but not limited to, the following:

(1) Indicators of student performance at the school in comparison with the county, state, regional and national student performance, as applicable, including student performance by grade level in the various subjects measured pursuant to a uniform statewide assessment program adopted by the state board; school attendance rates; the percent of students not promoted to next grade; and the graduation rate;

(2) Indicators of school performance in comparison with the aggregate of all other schools in the county and the state, as applicable, including enrollment; average class size; pupil-teacher ratio; pupil-administrator ratio; operating expenditure per pupil; county expenditure by fund in graphic display; and the average degree classification and years of experience of the administrators and teachers at the school;

(3) The names of the members of the local school improvement council, created pursuant to section two, article five-a of this chapter; and

(4) The name or names of the business partner or partners of the school.

(c) The school district report card shall include the data for each school for each separately listed applicable indicator and the aggregate of the data for all schools, as applicable, in the county for each indicator. The statewide school report card shall include the data for each county for each separately listed indicator and the aggregate for all counties for each indicator.

(d) The report cards shall be prepared using actual local school, county, state, regional and national data indicating the present performance of the school and also shall include the state norms and the upcoming year's targets for the school and the county board.

The state board shall provide technical assistance to each county board in preparing the school and school district report cards.

Each county board shall prepare report cards in accordance with the guidelines set forth in this section. The school district report cards shall be presented at a regular school board meeting subject to applicable notice requirements and shall be made available to a newspaper of general circulation serving the district. The school and school district report cards shall be made easily accessible on, or through a report card icon or link on, the county board website and provided in paper form upon request to the parent or parents, guardian or custodian of a child enrolled in that school. In addition, each county board shall submit the completed report cards to the state board which shall make copies available to any person requesting them. The report cards shall be completed and disseminated prior to January 1, 1989, and in each year thereafter, and shall be based upon information for the current school year, or for the most recent school year for which the information is available, in which case the year shall be clearly footnoted.

(e) In addition to the requirements of subsection (c) of this section, the school district report card shall list the following information:

(1) The names of the members of the county board and the dates upon which their terms expire; and

(2) The names of the county school superintendent and every assistant and associate superintendent and their area of school administration.

(f) The state board shall develop and implement a separate report card for nontraditional public schools pursuant to the appropriate provisions of this section to the extent practicable.

**§18-2E-4a. Exception to requirement of mailing school report cards.**

[Repealed.]

WV Legislature

**§18-2E-5. Process for improving education; education standards; statewide assessment program; accountability measures; Office of Education Performance Audits; school accreditation and school system approval; intervention to correct low performance.**

(a) Legislative findings, purpose, and intent. — The Legislature makes the following findings with respect to the process for improving education and its purpose and intent in the enactment of this section:

(1) The process for improving education includes four primary elements, these being:

(A) Standards which set forth the knowledge and skills that students should know and be able to perform as the result of a thorough and efficient education that prepares them for the twenty-first century, including measurable criteria to evaluate student performance and progress;

(B) Assessments of student performance and progress toward meeting the standards;

(C) A system of accountability for continuous improvement articulated by a rule promulgated by the state board that will build capacity in and ensure the efficiency of schools and districts to meet rigorous outcomes that assure student performance and progress toward obtaining the knowledge and skills intrinsic to a high-quality education, rather than monitoring for compliance with specific laws and regulations; and

(D) A method for building the capacity and improving the efficiency of schools and school systems to improve student performance and progress;

(2) As the constitutional body charged with the general supervision of schools as provided by general law, the state board has the authority following constructive engagement of the Legislature as provided in §18-2H-1 of this code and as delegated by the Legislature by general law to establish the standards and assess the performance and progress of students against the standards, and to exercise its supervisory responsibility to hold schools and school systems accountable and assist schools and school systems to build capacity and improve efficiency so that the standards are met, including, when necessary, seeking additional resources in consultation with the Legislature and the Governor;

(3) As the constitutional body charged with providing for a thorough and efficient system of schools, the Legislature has the authority and the responsibility to establish and be engaged constructively in the determination of the knowledge and skills that students should know and be able to do as the result of a thorough and efficient education. This determination is made by using the process for improving education to determine when school improvement is needed by evaluating the results and the efficiency of the system of schools, by ensuring accountability and by providing for the necessary capacity and its efficient use;

(4) In consideration of these findings, the purpose of this section is to establish a process for

improving education that includes the four primary elements as set forth in subdivision (1) of this subsection to provide assurances that the high-quality standards are, at a minimum, being met and that a thorough and efficient system of schools is being provided for all West Virginia public school students on an equal education opportunity basis; and

(5) The intent of the Legislature in enacting this section is to establish a process through which the Legislature, the Governor, and the state board will constructively consult on any measures affecting standards, assessments, and accountability prior to their adoption, examine the performance and progress of students, schools, and school systems and, when necessary, consider alternative measures to ensure that all students continue to receive the thorough and efficient education to which they are entitled. However, nothing in this section requires any specific level of funding by the Legislature.

(b) Electronic county and school strategic improvement plans. — The state board shall promulgate a rule consistent with this section and in accordance with §29A-3B-1 *et seq.* of this code establishing an electronic county strategic improvement plan for each county board and an electronic school strategic improvement plan for each public school in this state. Each respective plan shall be for a period of no more than five years and shall include the mission and goals of the school or school system to improve student, school, or school system performance and progress, as applicable. The strategic plan shall be revised annually in each area in which the school or system is below the standard on the annual performance measures. The plan shall be revised when required pursuant to this section to include each annual performance measure upon which the school or school system fails to meet the standard for performance and progress, the action to be taken to meet each measure, a separate time line and a date certain for meeting each measure, a cost estimate and, when applicable, the assistance to be provided by the department and other education agencies to improve student, school or school system performance and progress to meet the annual performance measure.

The department shall make available to all public schools through its website or the West Virginia Education Information System an electronic school strategic improvement plan boilerplate designed for use by all schools to develop an electronic school strategic improvement plan which incorporates all required aspects and satisfies all improvement plan requirements of the Every Student Succeeds Act or subsequent federal law.

(c) High-quality education standards and efficiency standards. — In accordance with §29A-3B-1 *et seq.* of this code, the state board shall adopt and periodically review and update high-quality education standards for student, school and school system performance and processes in the following areas:

- (1) Academic standards;
- (2) Workplace readiness skills;
- (3) Finance;

- (4) Transportation;
- (5) Special education;
- (6) Facilities;
- (7) Administrative practices;
- (8) Training of county board members and administrators;
- (9) Personnel qualifications;
- (10) Professional development and evaluation;
- (11) Student performance, progress, and attendance;
- (12) Professional personnel, including principals and central office administrators, and service personnel attendance;
- (13) School and school system performance and progress;
- (14) A code of conduct for students and employees;
- (15) Indicators of efficiency;
- (16) Digital literacy skills; and
- (17) Any other areas determined by the state board.

(d) Comprehensive statewide student growth assessment program. — The state board shall establish a comprehensive statewide student growth assessment program to assess student performance and progress in grades three through 12. The assessment program is subject to the following:

(1) The state board shall promulgate a rule in accordance with §29A-3B-1 *et seq.* of this code establishing the comprehensive statewide student growth assessment program which shall be composed of benchmark assessments that are given in the first 30 days of the school year and repeated at mid-year and a summative assessment at the end of the school year to determine student progression in reading and mathematics in grades three through eight;

(2) The state board shall align the comprehensive statewide student assessment for all grade levels in which the test is given with the academic standards adopted pursuant to subsection (c) of this section or develop other aligned tests to be required in grades three through eight and administered once during the grade span of nine through 12 to assess progress toward college and career readiness in English/language arts and math. The assessment in science shall be administered once in grade spans three through five, once in grade spans six through eight, and once in grade spans nine through 12;

(3) In accordance with §18-2-1 *et seq.* and §18-2E-1 *et seq.* of this code, the state board shall review or develop, and adopt a college and career readiness assessment to be administered in grade 11: *Provided*, That the adopted college and career readiness assessment administered in grade 11 counts toward the statewide student assessment and must be used by a significant number of regionally accredited higher education institutions for determining college admissions.

(4) The comprehensive statewide student growth assessment shall be administered to students in accordance with the requirements of the Every Student Succeeds Act or subsequent federal law;

(5) The state board may provide, through the statewide assessment program, other optional testing or assessment instruments applicable to grade levels kindergarten through grade 12 which may be used by each school to promote student achievement. The state board annually shall publish and make available, electronically or otherwise, to school curriculum teams and teacher collaborative processes the optional testing and assessment instruments. For any online assessment, the state board shall provide online assessment preparation to ensure that students have the requisite digital literacy skills to be successful on the assessment;

(6) The state board may adopt a career readiness assessment that measures and documents foundational workplace skills and leads to a nationally recognized work readiness certificate for students that meet minimum proficiency requirements; and

(7) The comprehensive statewide student growth assessment adopted prior to the testing window of the 2025-2026 school year shall continue to be used for at least a total of four consecutive years;

(8) No summative assessment approved by the state board may take more than two percent of a student's instructional time;

(9) No student may be required to complete a greater number of summative assessments than is required by the Every Student Succeeds Act except as otherwise required by this subsection; and

(10) Collection of personal data as part of the assessment process except for what is necessary for the student's instruction, academic and college and career search needs is prohibited.

(e) State annual performance measures for school and school system accreditation. —

The state board shall promulgate a rule in accordance with article §29A-3B-1 *et seq.* of this code that establishes a system that is based in multiple measures and meets the requirements of any federal law to assess and weigh annual performance measures to assure that schools and school systems are providing a thorough and efficient education to their

students. State accreditation shall be reviewed and approved in a balanced manner that gives fair credit to all measures affecting students and subgroups of students in the schools and school systems. The state board also may establish performance incentives for schools and school systems as part of the state accreditation system. On or before December 1, 2018, the state board shall report to the Governor and to the Legislative Oversight Commission on Education Accountability the proposed rule for establishing the measures and incentives of accreditation and the estimated cost therefore, if any. Thereafter, the state board shall provide an annual report to the Governor and to the Legislative Oversight Commission on Education Accountability on the impact and effectiveness of the accreditation system. The rule for school and school system accreditation proposed by the board may include, but is not limited to, the following measures:

- (1) Student proficiency and growth in English and language arts, math, science, and other subjects determined by the board;
- (2) Graduation and attendance rate;
- (3) Students taking and passing AP tests;
- (4) Students completing a career and technical education class;
- (5) Closing achievement gaps within subgroups of a school's student population; and
- (6) Students scoring at or above average attainment on SAT or ACT tests.

(f) Indicators of efficiency. — In accordance with §29A-3B-1 *et seq.* of this code, the state board shall adopt by rule and periodically review and update indicators of efficiency for use by the appropriate divisions within the department to ensure efficient management and use of resources in the public schools in the following areas:

- (1) Curriculum delivery including, but not limited to, the use of distance learning;
- (2) Transportation;
- (3) Facilities;
- (4) Administrative practices;
- (5) Personnel; and
- (6) Any other indicators as determined by the state board.

Each county board of education shall use the statewide electronic information system established by the state board for data collection and reporting to the state Department of Education.

(g) Assessment and accountability of school and school system performance and processes. — In accordance with §29A-3B-1 *et seq.* of this code, the state board shall establish by rule a system of education performance measures to evaluate the quality of education and the preparation of students based on the annual measures of student, school, and school system performance and progress. The system of education performance measures shall provide information to the state board, the Legislature, and the Governor, upon which they may determine whether a thorough and efficient system of schools is being provided. The system of education performance measures shall include:

- (1) The assessment of student, school, and school system performance and progress based on the annual measures established pursuant to subsection (e) of this section;
- (2) The evaluation of records, reports, and other documents that provide information on the quality of education and compliance with statutes, policies, and standards; and
- (3) The review of school and school system electronic strategic improvement plans.

(h) Uses of school and school system assessment information. — The state board shall use information from the system of education performance measures to assist it in ensuring that a thorough and efficient system of schools is being efficiently provided and to improve student, school and school system performance and progress. Information from the system of education performance measures further shall be used by the state board for these purposes, including, but not limited to, the following:

- (1) Determining accountability and accreditation for schools and school system approval status as required by state board rule and any federal law or regulations; and
- (2) Holding schools and school systems accountable for the efficient use of existing resources to meet or exceed the standards; and
- (3) Targeting additional resources when necessary to improve performance and progress.

The state board shall make the performance measures information available to the Legislature, the Governor, the general public, and to any individual who requests the information, subject to the provisions of any act or rule restricting the release of information.

(i) Early detection and intervention programs. — Based on the assessment of student, school and school system performance, and progress, the state board shall establish early detection and intervention programs using the available resources of the Department of Education, or other resources as appropriate, to assist underachieving schools and school systems to improve performance before conditions become so grave as to warrant more substantive state intervention. Assistance shall include, but is not limited to, providing additional technical assistance and programmatic, professional staff development, and providing monetary, staffing, and other resources where appropriate.

(j) The state board may employ experienced education professionals, who serve at the will and pleasure of the state board, to coordinate on site and school system improvement efforts with staff at the state Department of Education to support schools and school systems in improving education performance measures.

(k) School accreditation. —

(1) The state board shall establish levels of accreditation to be assigned to schools. The establishment of levels of accreditation shall be subject to the following:

(A) The levels will be designed to demonstrate school performance on multiple measures as established by the state board by legislative rule in accordance with §29A-3B-1 *et seq.* of this code and consistent with the applicable state laws, policies and standards, which include standards for performance-based accountability, high-quality education, and continuous improvement; and

(B) Will ensure compliance with federal law and applicable state laws, policies and standards at a minimum.

(2) The state board annually shall review the information from the system of education performance measures submitted for each school and shall accredit each school as designated in the rule, and consistent with the applicable state laws, policies, and standards; and

(3) Exercise other powers and actions the state board determines necessary to fulfill its duties of general supervision of the schools and school systems of West Virginia.

(l) School system approval. — The state board annually shall review the information submitted for each school system from the system of education performance measures and issue to each county board an approval status in compliance with federal law and established by state board rule.

(m) Non-approval for extraordinary circumstances.

(1) The state board shall establish and adopt additional standards to identify school systems in which the program may be non-approved and the state board may issue non-approval status whenever extraordinary circumstances exist as defined by the state board.

(2) When extraordinary circumstances exist, but do not rise to the level of immediate intervention as described in subsection (n) of this section, the state board may declare a state of emergency in the school system and shall direct designees to provide recommendations within 60 days of appointment for correcting the extraordinary circumstances. When the state board approves the recommendations, they shall be communicated to the county board. If progress in correcting the extraordinary circumstances, as determined by the state board, is not made within six months from the time the county board receives the recommendations, the state board shall intervene in the

operation of the school system to cause improvements to be made that will provide assurances that a thorough and efficient system of schools will be provided. This intervention may include, but is not limited to, the following:

(A) Limiting the authority of the county board in areas that compromise the delivery of a thorough and efficient education to its students as designated by the state board by rule, which may include delegating decision-making authority regarding these matters to the state superintendent who may:

(B) Declare that the office of the county superintendent is vacant;

(C) Declare that the positions of personnel who serve at the will and pleasure of the county superintendent as provided in §18A-2-1 of this code, are vacant, subject to application and reemployment;

(D) Fill the declared vacancies during the period of intervention; and

(E) Take any direct action necessary to correct the extraordinary circumstance.

(n) Notwithstanding any other provision of this section, the state board may intervene immediately in the operation of the county school system with all the powers, duties, and responsibilities contained in subsection (m) of this section, if the state board finds any of the following:

(1) A county board fails to act on a statutory obligation which would interrupt the day-to-day operations of the school system;

(2) That the conditions precedent to intervention exist as provided in this section; and that delaying intervention for any period of time would not be in the best interests of the students of the county school system; or

(3) That the conditions precedent to intervention exist as provided in this section and that the state board had previously intervened in the operation of the same school system and had concluded that intervention within the preceding five years.

(o) Capacity. — The process for improving education includes a process for targeting resources strategically to improve the teaching and learning process. Development of electronic school and school system strategic improvement plans, pursuant to subsection (b) of this section, is intended, in part, to provide mechanisms to target resources strategically to the teaching and learning process to improve student, school, and school system performance. When deficiencies are detected through the assessment and accountability processes, the revision and approval of school and school system electronic strategic improvement plans shall ensure that schools and school systems are efficiently using existing resources to correct the deficiencies. When the state board determines that schools and school systems do not have the capacity to correct deficiencies, the state board shall take one or more of the following actions:

(1) Work with the county board to develop or secure the resources necessary to increase the capacity of schools and school systems to meet the standards and, when necessary, seek additional resources in consultation with the Legislature and the Governor;

(2) Recommend to the appropriate body including, but not limited to, the Legislature, county boards, schools and communities methods for targeting resources strategically to eliminate deficiencies identified in the assessment and accountability processes. When making determinations on recommendations, the state board shall include, but is not limited to, the following methods:

The state board, or its designee, the West Virginia Department of Education, and county school systems, shall work collaboratively in:

(1) Examining reports and electronic strategic improvement plans regarding the performance and progress of students, schools, and school systems relative to the standards and identifying the areas in which improvement is needed;

(2) Determining the areas of weakness and of ineffectiveness that appear to have contributed to the substandard performance and progress of students or the deficiencies of the school or school system;

(3) Determining the areas of strength that appear to have contributed to exceptional student, school, and school system performance and progress and promoting their emulation throughout the system;

(4) Requesting technical assistance from the School Building Authority in assessing or designing comprehensive educational facilities plans;

(5) Recommending priority funding from the School Building Authority based on identified needs;

(6) Recommending special staff development programs from county boards based on identified needs;

(7) Submitting requests to the Legislature for appropriations to meet the identified needs for improving education;

(8) Directing educational expertise and support services strategically toward alleviating deficiencies;

(9) Ensuring that the need for facilities in counties with increased enrollment are appropriately reflected and recommended for funding;

(10) Ensuring that the appropriate person or entity is held accountable for eliminating deficiencies; and

(11) Ensuring that the needed capacity is available from the state and local level to assist the school or school system in achieving the standards and alleviating the deficiencies.

(p) Building leadership capacity. — To help build the governance and leadership capacity of a county board during an intervention in the operation of its school system, and to help assure sustained success following return of control to the county board, the county board shall establish goals and action plans, subject to approval of the state superintendent, to improve performance sufficiently to end the intervention within a period of not more than five years. The state superintendent shall maintain oversight and provide assistance and feedback to the county board on development and implementation of the goals and action plans. At a minimum, the goals and action plans shall include:

(1) An analysis of the training and development activities needed by the county board and leadership of the school system for effective governance and school improvement;

(2) Support for the training and development activities identified which may include those made available through the state superintendent, West Virginia School Board Association, and other sources identified in the goals and action plans; and

(3) Active involvement by the county board in the improvement process, working in tandem with the county superintendent to gather, analyze and interpret data, write time-specific goals to correct deficiencies, prepare and implement action plans and allocate or request from the Department of Education the resources, including board development training and coaching, necessary to achieve approved goals and action plans and sustain system and school improvement.

At least once each year during the period of intervention, the state board shall appoint a designee to assess the readiness of the county board to accept the return of control of the system or school from the state board and sustain the improvements, and shall make a report and recommendations to the state board supported by documented evidence of the progress made on the goals and action plans. The state board may return any portion of control of the operations of the school system or end the intervention in its entirety by a majority vote. If the state board determines at the fifth annual assessment that the county board is still not ready to accept return of control by the state board and sustain the improvements, the state board shall hold a public hearing in the affected county at which the attendance by all members of the county board is requested so that the reasons for continued intervention and the concerns of the citizens of the county may be heard. The state board may continue the intervention only after it holds the public hearing and may require revision of the goals and action plans. The state board must thereafter hold a public hearing after each annual assessment beyond the fifth year. If a school system is in intervention status on the effective date of this provision, the total years of intervention shall be calculated from the date of initial intervention.

Following the termination of an intervention in the operation of a school system and return of full control by the state board, the support for governance education and development

shall continue as needed for up to three years. If at any time within this three years, the state board determines that intervention in the operation of the school system is again necessary, the state board shall again hold a public hearing in the affected county so that the reasons for the intervention and the concerns of the citizens of the county may be heard prior to intervening.

WV Legislature

**§18-2E-5a. County superintendent employment contract.**

(a) The Legislature previously granted authority to the state board to intervene in the operation of a county school system in section five, article two-e of this chapter. Part of the authority given is the authority of the state board to declare that the office of the county superintendent is vacant. County boards enter into contracts to employ persons as superintendents for a term of years which creates substantial rights and obligations. Although the statute provides that the state board may declare the office of the county superintendent vacant, the statute did not specifically give the state board authority to void the contract of the county superintendent. The intent of this section is to clarify what contractual obligations continue after removal.

(b) Whenever the state board intervenes in the operation of a school system and the office of the county superintendent is declared vacant pursuant to section five, article two-e of this chapter, the state board may, for any intervention which is instituted after the effective date of this section, void any existing employment contract between the county board and the county superintendent.

(c) Whenever a county board elects a county superintendent and enters into a written contract of employment with the superintendent, the county board shall include within the contract a conspicuous clause that informs the superintendent that if the state board intervenes in the operation of the county school system pursuant to section five, article two-e of this chapter, the state board may vacate the office and void the employment contract.

**§18-2e-5c.**

Repealed.

Acts, 2013 Reg. Sess., Ch. 55.

WV Legislature

**§18-2E-5d. Standards for the duration of school bus transportation times for students to and from school.**

(a) The high quality standards for transportation adopted by the state board pursuant to section five of this article shall include standards for the recommended duration of the one-way school bus transportation time for students to and from school under normal weather and operating conditions as follows:

- (1) For elementary school students, thirty minutes;
- (2) For middle school, intermediate school and junior high school students, forty-five minutes; and
- (3) For high school students, sixty minutes.

(b) A county board may not create a new bus route for the transportation of students in any of the grade levels prekindergarten through grade five to and from any school included in a school closure, consolidation or new construction project approved after July 1, 2008, which exceeds by more than fifteen minutes the recommended duration of the one-way school bus transportation time for elementary students adopted by the state board in accordance with subsection (a) of this section unless:

- (1) The county board adopts a separate motion to approve creation of the route and request written permission of the state board to create the route; and
- (2) Receives the written permission of the state board to create the route.

(c) A county board may not create, nor may the state board permit, the creation of a new bus route for the transportation of students in any of the grade levels prekindergarten through grade five to and from any school included in a school closure, consolidation or new construction project approved after July 1, 2008, which exceeds by more than thirty minutes the recommended duration of the one-way school bus transportation time for elementary students adopted by the state board in accordance with subsection (a) of this section.

(d) The state board shall provide technical assistance to county boards with the objective of achieving school bus transportation routes for students which are within the recommended time durations established by the state board.

**§18-2E-6. Falsifying reports; penalty.**

It shall be unlawful for any person knowingly and intentionally to falsely report any information required under this article.

Any person who violates the provisions of this section is guilty of a misdemeanor, and, upon conviction thereof, shall be imprisoned in the county jail for not more than one year, or fined not more than \$1,000, or both.

WV Legislature

**§18-2E-7. Providing for instruction and learning in all public schools.**

(a) The Legislature finds that:

(1) The knowledge and skills children need to succeed are changing dramatically and that West Virginia students must develop proficiency in the subject matter content, technology tools and learning skills to succeed and prosper in life, in school and on the job;

(2) Students must be equipped to live in a multitasking, multifaceted, technology-driven world;

(3) The provision technologies and software resources in grades prekindergarten through twelve is necessary to meet the goal that high school graduates will be prepared fully for college, other post-secondary education or gainful employment;

(4) This goal reflects a fundamental belief that the youth of the state exit the system equipped with the skills, competencies and attributes necessary to succeed, to continue learning throughout their lifetimes and to attain self-sufficiency;

(5) To promote learning, teachers must be competent in content and learning skills and must be equipped to fully integrate technology to transform instructional practice and to support skills acquisition;

(6) For students to learn technology skills, students and teachers must have equitable access to high quality, technology tools and resources;

(7) When aligned with standards and curriculum, technology-based assessments can be a powerful tool for teachers; and

(8) Teachers must understand how to use technology to create classroom assessments for accurate, timely measurements of student proficiency in attainment of academic content.

(b) The state board shall ensure that the resources to be used to provide technology services to students in grades prekindergarten through twelve are included in a West Virginia Strategic Technology Learning Plan to be developed by the Department of Education as an integral component of the county electronic strategic improvement plan required in section five of this article. The provision of technologies and services to students and teachers shall be based on a county technology plan developed by a team that includes school building-level professional educators and is aligned with the goals and objectives of the West Virginia Strategic Technology Learning Plan. This plan shall be an integral component of the county electronic strategic improvement plan as required in section five of this article. Funds shall be allocated equitably to county school systems following peer review of the plans that includes providing necessary technical assistance prior to submission and allows timely review and approval by the West Virginia Department of Education. Equitable allocation shall be defined by the state board and may include per school-site equity for technologies requiring a site license or other per school application. Technology tools purchased from

appropriations for this section shall adhere to state contract prices: Provided, That contingent upon approval of the county technology plan, counties that identify, within that plan, specific software or peripheral equipment not listed on the state contract, but necessary to support implementation, may request the West Virginia Department of Education to secure state purchasing prices for those identified items. Total expenditure to purchase these additional items may not exceed ten percent of the annual county allocation. To the extent practicable, the technology shall be used:

(1) To maximize student access to learning tools and resources at all times including during regular school hours, before and after school or class, in the evenings, on weekends and holidays and for public education, noninstructional days and during vacations; and

(2) For student use for homework, remedial work, personalized learning, independent learning, career planning and adult basic education.

(c) The implementation of this section should provide a technology infrastructure capable of supporting multiple technology-based learning strategies designed to enable students to achieve at higher academic levels. The technology infrastructure should facilitate student development by addressing the following areas:

(1) Mastery of rigorous core academic subjects in grades prekindergarten through eight by providing software, other technology resources or both aligned with state standards in reading, mathematics, writing, science, social studies and learning tools;

(2) Mastery of rigorous core academic subjects in grades nine through twelve by providing appropriate technology tools aligned with state standards for learning skills and technology tools;

(3) Attainment of skill outcomes for all students in the use of technology tools and learning skills;

(4) Proficiency in new, emerging content;

(5) Participation in relevant, contextual instruction that uses dynamic, real-world contexts that are engaging and meaningful for students, making learning relevant to life outside of school and bridging the gap between how students live and how they learn in school;

(6) Ability to use digital and emerging technologies to manage information, communicate effectively, think critically, solve problems, work productively as an individual and collaboratively as part of a team and demonstrate personal accountability and other self-directional skills;

(7) Providing students with information on post-secondary educational opportunities, financial aid and the skills and credentials required in various occupations that will help them better prepare for a successful transition following high school;

(8) Providing greater access to advanced and other curricular offerings than could be provided efficiently through traditional on-site delivery formats, including increasing student access to quality distance learning curricula and online distance education tools;

(9) Providing resources for teachers in differentiated instructional strategies, technology integration, sample lesson plans, curriculum resources and online staff development that enhance student achievement; and

(10) Providing resources to support basic skills acquisition and improvement at the above mastery and distinguished levels.

(d) Developed with input from appropriate stakeholder groups, the West Virginia Strategic Technology Learning Plan shall be an integral component of the electronic strategic county improvement plan as required in section five of this article. The West Virginia Strategic Technology Learning Plan shall be comprehensive and shall address, but not necessarily be limited to, the following provisions:

(1) Allocation of adequate resources to provide students with equitable access to technology tools, including instructional offerings and appropriate curriculum, assessment and technology integration resources aligned to both the content and rigor of state content standards as well as to learning skills and technology tools;

(2) Providing students and staff with equitable access to a technology infrastructure that supports the acquisition of skills in the use of technology, including the ability to access information, solve problems, communicate clearly, make informed decisions, acquire new knowledge, construct products, reports and systems and access online assessment systems;

(3) Inclusion of various technologies that enable and enhance the attainment of the skills outcomes for all students;

(4) Collaboration with various partners, including parents, community organization, higher education, schools of education in colleges and universities, employers and content providers;

(5) Seeking of applicable federal government funds, philanthropic funds, other partnership funds or any combination of those types of funds to augment state appropriations and encouraging the pursuit of funding through grants, gifts, donations or any other sources for uses related to education technology;

(6) Sufficient bandwidth to support teaching and learning and to provide satisfactorily for instructional management needs;

(7) Protection of the integrity and security of the network, as well as student and administrative workstations;

(8) Flexibility to adjust the plan based on developing technology, federal and state

requirements and changing local school and county needs;

(9) Incorporation of findings based upon validation from research-based evaluation findings from previous West Virginia-based evaluation projects;

(10) Continuing study of emerging technologies for application in a learning environment and inclusion in the technology plan, as appropriate;

(11) An evaluation component to determine the effectiveness of the program and make recommendations for ongoing implementation;

(12) A program of embedded, sustained professional development for teachers that is strategically developed to support a thorough and efficient education for all students and that aligns with state standards for technology, integrates technology skills into educational practice and supports the implementation of software, technology and assessment resources in the classroom;

(13) Providing for uniformity in technological hardware and software standards and procedures;

(14) The strategy for ensuring that the capabilities and capacities of the technology infrastructure is adequate for acceptable performance of the technology being implemented in the public schools;

(15) Providing for a comprehensive, statewide uniform, integrated education management and information system for data collection and reporting to the Department of Education and the public;

(16) Providing for an effective model for the distance delivery, virtual delivery or both types of delivery of instruction in subjects where there exists low student enrollment or a shortage of certified teachers or where the delivery method substantially improves the quality of an instructional program such as the West Virginia Virtual School;

(17) Providing a strategy to implement, support and maintain technology in the public schools;

(18) Providing a strategy to provide ongoing support and assistance to teachers in integrating technology into instruction such as with technology integration specialists and technology system specialists;

(19) A method of allowing public education to take advantage of appropriate bulk purchasing abilities and to purchase from competitively bid contracts initiated through the southern regional education board educational technology cooperative and the America TelEdCommunications Alliance;

(20) Compliance with United States Department of Education regulations and Federal

Communications Commission requirements for federal E-rate discounts; and

(21) Other provisions as considered appropriate, necessary or both to align with applicable guidelines, policies, rules, regulations and requirements of the West Virginia Legislature, the Board of Education and the Department of Education.

(e) Any state code and budget references to the Basic Skills/Computer Education Program and the SUCCESS Initiative will be understood to refer to the statewide technology initiative referenced in this section, commonly referred to as the 21st Century Tools for 21st Century Schools Technology Initiative.

**§18-2E-8. Creating jobs through education.**

(a) Findings and intent. -- The Legislature finds that the Governor, the Legislature, the state board and the people of West Virginia established goals for education through an education summit and series of town meetings in the summer of the year 1990, and that these goals were codified in section four, article one of this chapter during the third extraordinary session of the Legislature of that year. Among these goals is the goal that high school graduates will be prepared fully for college, other post-secondary education or gainful employment and that the number of high school graduates entering post-secondary education will increase by fifty percent. The Legislature finds that this goal reflects a fundamental belief that the result of a thorough and efficient system of free schools is that the youth of the state exit the system equipped with the skills, competencies and attributes necessary to succeed, to continue learning throughout their lifetimes and to attain economic self-sufficiency.

The Legislature further finds that the full preparation of youth as indicated in these findings cannot be accomplished by the school system alone, but requires the full and active partnership with parents and people from business, labor, higher education, economic development and other organizations and entities in the community that have an interest in providing quality education. Therefore, the intent of this section is to establish a policy framework and strategy for the state board in fulfilling its responsibility for the general supervision of free schools in order to encourage and utilize actively involved partnerships in the formulation of rules and practices to achieve the goal that high school graduates will be prepared fully for college, other post-secondary education or gainful employment, particularly in the delivery of programs that provide work-based learning opportunities for students within the school or at the workplace. The Legislature recognizes that many skilled jobs require education beyond the high school level, that the goals of West Virginia include increased post-secondary attendance and that the goals for post-secondary education as set forth in section one-a, article one, chapter eighteen-b of this code include an increased focus within higher education on relevancy, responsiveness to business, industry, labor and community needs, and on the current and future work force needs of the state. Therefore, it is further the intent of this section to enhance the linkages between secondary and post-secondary education.

(b) Comprehensive goals for jobs through education. -- The Legislature hereby establishes the following goals to be accomplished by the year 2001 for all students in all schools:

(1) The elimination of student grouping or tracking systems that result in high school students completing a general curriculum that does not prepare them fully for college, other post-secondary education or gainful employment;

(2) The replacement of the general curriculum, as stated in subdivision (1) of this subsection, with a system of career clusters and education majors that increases the academic expectations for all students, includes a system of career information and guidance and incorporates structured work-based learning;

(3) The requirement that every student, in consultation with his or her parents and school advisor, establish an individualized student transition plan covering grades nine through twelve and the first year beyond graduation from high school;

(4) The active involvement of partners at the state, regional and local levels in assuring the full preparation of graduates for college, other post-secondary education or gainful employment;

(5) The creation of a process through which qualified graduates will receive a portable credential that is recognized and valued by employers as an indicator of the skills, competence and readiness for employment of the graduates; and

(6) The implementation of continuous program assessment, program improvement and staff development.

(c) Increased academic expectations and career development for all students. -- The Legislature finds that there is a need to establish higher academic expectations and a system of career development for all students that contains the following elements:

(1) Assessment. -- The implementation of an assessment program that measures student performance by grade level and assesses student attainment of the basic academic foundation skills;

(2) Focus on basic skills in kindergarten through fourth grade. -- The strengthening and refocusing of kindergarten through fourth grade in order to assure that all students perform at grade level at the completion of the fourth grade by concentrating on teaching the basics of reading, writing, mathematics and computer skills;

(3) Development of rigorous curriculum. -- The development and implementation of a rigorous and relevant curriculum of basic academic requirements that lays a foundation for further learning and skill development. The proficiencies of the students shall be assessed at the end of the eighth grade and all students should attain the basic academic requirement levels by no later than the end of the tenth grade;

(4) Career exploration in grades five through eight. -- The exploration by students in the fifth through eighth grades of their interests and abilities in career clusters through accessing information about occupational skills and labor markets;

(5) Creation and initial implementation of individual student transition plan for grades nine and ten. -- The creation, by the end of the eighth grade, of the first two years of an individualized student transition plan that builds upon career awareness and exploration activities in the earlier grades and enables the student in consultation with his or her parents and school advisor to select a broad career cluster for further exploration in grades nine and ten;

(6) Choosing career majors for grades eleven through post-secondary. -- The creation of the

second part of the individualized student transition plan by the end of the tenth grade. The second part of the individualized student transition plan shall establish a career major for the final years of high school and the first year after high school that will prepare the student for college, other post-secondary education or gainful employment;

(7) Implementation of career majors. -- The fulfillment of the secondary education component of the career major in grades eleven and twelve, including the successful completion of the necessary curriculum and participation in work-based learning experiences; and

(8) Completion of individualized student transition plan and assessment. -- The completion of the individualized student transition plan in the first year following graduation from high school by attending college, other post-secondary education or securing gainful employment. The state board shall provide an assessment form to be completed by the student and returned to the high school upon the completion of the individualized student transition plan. The form shall provide for the student to report his or her success in completing the plan and the strengths and weaknesses of his or her education preparation.

(d) Report of recommendations on comprehensive career development. -- To assist in the establishment of a comprehensive career development system, the state school-to-work steering committee shall report to the state board and the Legislative Oversight commission on education accountability by November 1, 1996, the recommendations of the career guidance committee established pursuant to the state school-to-work implementation plan.

(e) Guidelines for increasing the ability of all students to meet higher academic expectations and become self-motivated learners. -- Practices that increase the academic expectations for all students and help them to succeed in achieving those higher expectations include, but are not limited to:

(1) Utilizing instructional methods that require the student to be a worker who is actively engaged in the learning process;

(2) Utilizing methodologies that require students to apply academic knowledge in practical situations and problem solving;

(3) Utilizing computers and other technologies to provide opportunities for creative instruction, both individually and in groups in all subjects;

(4) Providing structured opportunities for students to participate in credit and noncredit learning activities outside the school that are integrated with and are an extension of the school-based program of study for the student through such activities as field trips, job shadowing, community service, entrepreneurship development, mentoring, internships, apprenticeships, school-based enterprises in partnership with the private sector and other cooperative learning experiences connected to student education majors and school-based instructional programs;

(5) Integrating and interrelating academic and technical content throughout the curriculum and ensuring numerous opportunities for cross-disciplinary learning to emphasize the importance of reading, writing, speaking, listening and viewing; and

(6) Encouraging teachers to plan and work together and exercise their professional judgment in the classroom.

(f) Establishing partnerships. -- As soon as practicable following the effective date of this section, the Governor shall appoint or designate a "Jobs Through Education Employer Panel", to assure the high quality preparation of our youth for college, other post-secondary education or gainful employment. The jobs through education employer panel shall advise and assist the state board, the higher education governing boards and institutions, other post-secondary education training programs and agencies and employers in assuring that graduates are prepared fully for further education and training or gainful employment and shall perform other functions as set forth in this section. In providing such advice and assistance and in the performance of such other functions, the jobs through employer panel shall solicit input from the county steering committees.

As soon as practicable, following the effective date of this section, county boards shall appoint a county steering committee that includes parents and people from business, labor, higher education, economic development, local school improvement councils, faculty Senates and other organizations and entities in the community as valuable partners in developing and implementing a system within the county that meets the intent of this section and adheres to the rules of the state board. The membership of the county steering committee and participation in the community and technical college district consortia committee, as created by section three-a, article three, chapter eighteen-b of this code, shall be coordinated to the extent that it is practical.

(g) Guidelines for work-based learning. -- Work-based learning is a structured activity that correlates with and is mutually supportive of school-based learning for the student, and includes specific objectives to be mastered by the student as a result of the activity. It is central to the education preparation process to develop within the student an awareness of the work environment and how the skills the student is acquiring will be applied in that environment. Broadly defined, work-based learning opportunities are activities that assist students to gain an awareness of the workplace, develop an appreciation of the relevancy of academic subject matter to workplace performance and gain valuable work experience and skills while exploring their occupational interests and abilities. Incorporating work-based learning as a central part of the education process and also as a final step in the formal education process includes, but is not limited to:

(1) Providing students in the early grades with activities such as field trips, career-oriented speakers in the classroom, courses such as junior achievement which are taught by volunteers in the classroom, job shadowing and other such activities to increase student awareness of the workplace; and

(2) Providing students in the later grades, including college and other post-secondary education, with activities such as structured community service, apprenticeships, internships, clinical experiences, cooperative education and other work-site placements, school-based enterprises, workplace simulations and entrepreneurial development, that provide students with more specific work experience in an occupational area associated with their education major.

To the extent possible, student work-based learning, and particularly workplace learning, should be jointly assessed by a school-based educator or advisor and a work-based mentor who possesses the skills set forth in the work-based learning objectives of the student, and who has been trained in mentoring and assessing student performance.

(h) Special consideration for providing work-based learning in counties with few opportunities for employment. -- Providing work-based learning opportunities for all students in counties with few employers will be particularly difficult. While the following additional examples of ways to increase opportunities for work-based learning are applicable for all counties, they are most important in counties with few employers. Additional examples include, but are not limited to:

- (1) Computer software that simulates workplace situations and problem solving;
- (2) Interactive and other technology to bring an exposure to the workplace into the classroom;
- (3) Community service;
- (4) Partnerships with city, state and county government for work-based placements;
- (5) Volunteer programs, such as junior achievement and other programs that utilize volunteers trained to deliver work-related instruction;
- (6) Assumption of recordkeeping and other measures by the schools, or through the use of community-based organizations or other intermediaries, that make it easier for small businesses to participate in accepting students for workplace learning;
- (7) Rural entrepreneurship through action learning programs;
- (8) School-based enterprises;
- (9) Projects through 4-H, scouts, junior ROTC and other school and nonschool student and civic organizations;
- (10) Multiple partnerships with existing employers, such as hospitals that have multiple departments;
- (11) Agricultural education, FFA projects and supervised work experience programs; and

(12) Programs at vocational-technical education centers.

The state board shall make recommendations to the Legislature by November 1, 1996, on any further actions that may be appropriate to assist counties with few employers in providing work-based learning opportunities for all students.

(i) Electronic portfolio of student accomplishments and preparation. -- For the purpose of better documenting the preparation of high school graduates for college, other post-secondary education or gainful employment, the state board shall develop an electronic portfolio which will be a permanent record for every student. The electronic portfolio shall be issued by the appropriate county board and shall include the accomplishments of the student during his or her education preparation. Upon request, students shall receive the contents of the electronic portfolio in written or computer readable form. The electronic portfolio shall be subject to the same confidentiality and disclosure laws and rules as any other student records. The electronic portfolio shall include, but not be limited to:

(1) Documentation of attendance, grades, accomplishments, education plans, education major interests, curriculum, special activities, honors and advanced education and other items appropriate for inclusion in the portfolio as determined by state board rule to present the accomplishments and achievements of the student;

(2) A separate area for the student to enter presentations, examples and other information on his or her special areas of interest and advanced achievement;

(3) Certification of student attainment of the minimum level of proficiency in the basic skills that lays the foundation for further learning and skill development for success in college, other post-secondary education or gainful employment; and

(4) Certification of the skills, competence and readiness for college, other post-secondary education or employment, as indicated by: (i) College entrance tests; (ii) specialized assessments that measure the attainment of necessary skills and competencies required in the workplace; (iii) the attainment of industry recognized credentials, licensure or certification; (iv) the completion of nationally accredited technical education programs; (v) performance in specialized learning experiences such as paid and unpaid structured work-based learning in the private or public sectors, including, but not limited to, registered youth apprenticeships, internships, cooperative education, community service, entrepreneurship development and school-based enterprises in partnership with the private sector; and (vi) other indicators relevant to the student's skills, competence and readiness for college, other post-secondary education or gainful employment.

(j) Guidelines for certification on the electronic portfolio of student skills, competencies and readiness for employment. -- The certification of student skills, competencies and readiness for a particular industry or occupation to be included on the electronic portfolio, including certification offered by an institution of higher education or other job training programs, shall require the approval of an appropriate entity designated by the jobs through education

employer panel. Local education agencies, institutions of higher education and other job training programs desiring to issue such certification to meet local labor market or community needs and circumstances may apply to the panel for such approval. To the extent possible, such certification shall provide the student with a proficiency credential that is widely recognized and accepted within an industry or occupational area as a reliable indicator of the ability of the student. The jobs through education employer panel shall consult other established skill standards for use in certifying proficiency in skills, competencies and readiness within specific industries and occupations. The intent of these provisions is to provide a formal mechanism for the ongoing alignment of the certification of student skills, competencies and readiness with current minimum requirements for success in the industry or occupational area for which the student is preparing, including requirements which will be met through additional education in college or other post-secondary education.

(k) Staff development. -- Meeting the intent and objectives of this section will require a continued focus on staff development to increase the ability of teachers and administrators to employ various methodologies for strengthening the rigor, content and relevance of the learning process and help all students achieve at higher levels. Teachers and administrators must know about workplace requirements to help students internalize the relationship between learning in school and success in the careers they envision for themselves in adult life. The use of student assessment and program evaluation information continually to check and improve the curriculum, instruction, school climate and school organization and management, is critical to maintaining high quality instruction that is relevant to changing workplace requirements. Staff development opportunities shall include, but not be limited to:

(1) Designation by the state board of exemplary counties and schools that have implemented comprehensive school-to-work systems as model demonstration sites to be visited and observed;

(2) Collaboration and utilization of the resources of the state Department of Education, institutions of higher education, the center for professional development and county staff development councils for both in-service and preservice preparation programs;

(3) Teacher and business exchange programs that enable teachers to gain exposure and experience in the workplace and business persons to gain exposure and experience in the schools; (4) Structured programs or institutes that take educators into the workplace to observe the work environment and skills necessary to perform work tasks; and

(5) Staff development activities which include joint participation by public school, college and other post-secondary faculty where appropriate.

(l) Study committee for staff development credits. -- There is hereby created a study committee to make recommendations on the feasibility of, and the possible process for, crediting staff development activities toward fulfilling the requirement for renewal of

certificates, pursuant to section three, article three, chapter eighteen-a of this code, and the progression through the state minimum salary schedule, pursuant to section two, article four of said chapter. The committee shall consist of the chancellor of the university of West Virginia board of trustees, or a designee; the state superintendent, or a designee, who shall serve as chair of the committee; a member of the state board, to be selected by the state board; a representative of West Virginia University to be selected by the president of the university; a representative of Marshall university, to be selected by the president of the university; a representative of the West Virginia graduate college, to be selected by the president of the college; four classroom teachers to be appointed by the Governor within thirty days of the effective date of this section; and the director of the center for professional development or a designee. Such committee shall report its recommendations to the Legislative Oversight commission on education accountability by January 1, 1997.

(m) State board rule. -- On or before November 1, 1996, the state board, with advice from the jobs through education employer panel, and in consultation with the higher education governing boards, shall adopt a rule in accordance with the provisions of article three-b, chapter twenty-nine-a of this code for the implementation of this section. The rule shall allow flexibility for local variation to meet local circumstances and shall establish a five-year plan for phased implementation. The proposed rule developed pursuant to this section shall contain a financial impact statement as well as a job impact statement.

(n) Any study groups or committees created by the state board to assist in development of policies or rules for the implementation of this section shall contain significant representation by classroom teachers as defined by section one, article one, chapter eighteen-a of this code. Further, the state board shall include in its annual budget request sufficient funds to implement programs, policies or rules adapted to meet the goals set out in this section: Provided, That nothing in this section shall be construed to require any specific level of funding by the Legislature.

**§18-2E-8a. Electronic portfolio repealed.**

Notwithstanding the provisions of subsections (i) and (j), section eight of this article, information on student attainment of special skills, honors, advanced education, exceptional performance and other outstanding accomplishments shall be included on the certificate of proficiency granted to eligible high school graduates along with the diploma pursuant to section six, article two of this chapter. All provisions for development of an electronic portfolio by the state board are hereby null and void and without future effect.

**§18-2E-8b.**

Repealed.

Acts, 2014 Reg. Sess., Ch. 47.

WV Legislature

**§18-2E-8c. The "Robert C. Beach" vocational agriculture credit.**

(a) The Legislature finds that vocational agriculture curriculum plays a vital role in the development of science education for those students enrolled in the program. The Legislature further finds that as a former member of the West Virginia House of Delegates, Robert C. Beach was a strong supporter of the vocational agriculture program.

(b) Students completing two successful semesters in vocational agriculture classes, as defined by state board policy on October 1, 1999, shall receive no more than one of the three required units towards high school graduation for science.

**§18-2E-8d. Further expressions of legislative intent with respect to this article; parental consent for substitute classes.**

(a) The Legislature finds that many school systems are improving the quality of education for their students through implementation of the goals and policies set forth in this article. The Legislature finds that local school systems have had and should continue to have substantial flexibility for implementing these improvements. The Legislature further finds that certain of the goals address legally recognized elements within the definition of a thorough and efficient education among which is the development in every child his or her capacity and knowledge to intelligently pursue his or her options. The purpose of this section is to further this progress through a greater expression of the legislative intent with respect to eliminating the general track curriculum and to insure that all students perform at high levels of academic achievement.

(b) The intent of the Legislature is to provide in an economical manner for a thorough and efficient education that:

(1) Provides information to parents and students which clearly identifies the courses a student should take to prepare fully for continuing their education in college, other post-secondary education or employment so they can intelligently choose among the many options available to them;

(2) Encourages the involvement of parents in their child's education by providing parents and students with information and opportunities to help students explore their interests and plan a program of study while they are still in high school and have greater options and flexibility;

(3) Ensures that the quality, content, and alignment of the curriculum is sufficient to prepare students fully for the transition to college, other post-secondary education or employment in areas in which they have an interest following graduation from high school; and

(4) Improves student learning by increasing the rigor of the curriculum, making it more relevant to students, and reinforcing academic instruction through applications to real life problem solving so that whatever options a student pursues following graduation from high school, the student has acquired a foundation of knowledge, skills and abilities that prepares him or her fully for success.

(c) Notwithstanding the courses specified as required major courses within a high school program of study, a student in consultation with his or her parents and school advisor, and with the written consent of his or her parents, may take a higher level course, advanced placement course, college course or other more rigorous substitute. The parental consent form shall include a certification signed by the school advisor that the parents were advised of the impact of the substitute course on the student's preparation for college, other post-secondary education or employment in the student's major field of study and that the student's certificate of proficiency will not indicate that the student completed a program of

study major unless such substitute courses are related to the major field of study selected by the student.

(d) Notwithstanding the courses specified as recommended electives within a high school program of study, a student in consultation with his or her parents and school advisor, and with the written consent of his or her parents, may substitute other elective courses in place of those recommended to prepare the student fully for continuing his or her education in college, other post-secondary education or employment. The parental consent form shall include a certification signed by the school advisor that the parents were advised of the impact of the substitute course on the student's preparation for college, other post-secondary education or employment in the student's major field of study and that the student's certificate of proficiency will not indicate that the student completed a program of study major unless such substitute courses are related to the major field of study selected by the student.

(e) On or before July 1, 1999, the state board shall establish a uniform parental consent form to be maintained in the students permanent record for the purposes of subsections (c) and (d) of this section which shall contain:

(1) A statement to be signed and dated by the parents to consent to their child's substitution of another course for a required major course as provided in subsection (c) of this section and the course titles of the required major course and the substitute course;

(2) A statement to be signed and dated by the parents to consent to their child's substitution of another course for a recommended elective course as provided in subsection (d) of this section and the course titles of the recommended elective course and the substitute course; and

(3) A statement to be signed and dated by the school advisor certifying that the school advisor advised the parents of the impact of the substitute course on the student's preparation for college, other post-secondary education or employment in the student's major field of study and the student's certificate of proficiency.

(f) Nothing in this section shall prohibit a county board from establishing high school graduation requirements which exceed the minimum high school graduation requirements established by the state board.

**§18-2E-8e. Veteran's honors funeral assistant community service program.**

(a) Findings. -- The Legislature makes the following findings:

(1) Serving in the armed services in defense of the life, liberty and pursuit of happiness enjoyed in our democratic society involves a tremendous sacrifice on the behalf of those who serve, often at the cost of their own lives;

(2) It is a fitting tribute to those who have served in the Armed Forces and the families who have shared in their sacrifice to honor that service and that sacrifice in the most respectful manner;

(3) It is often difficult for the families of deceased veterans who wish to lay their loved ones finally to rest in a military honors funeral to find a bugler to sound their final Taps; and

(4) Organizations within the state and nationally, such as the Veterans of Foreign Wars, the American Legion, Bugles Across America and many others, have recognized the difficulty of finding buglers to sound Taps at military honors funerals and may be able to assist.

(b) Purpose. -- The purpose of this section is to facilitate collaboration that will encourage capable young people to assist with the sounding of Taps at military funerals honoring our veterans and, thereby, help them to develop a better understanding of the sacrifices, a respect for the commitment and an appreciation of the privileges that the men and women of the armed services have protected through their service.

(c) State board guidelines. -- The state board shall, in collaboration with organizations and supporters of veterans, establish general guidelines for the establishment of school level programs that encourage capable students in grades six through twelve, inclusive, to sound Taps on a standard or valved bugle, trumpet, cornet or flugelhorn during military honors funerals held in this state. The general guidelines shall address the issues to be set forth in the county board policies required under this section and shall include contact information for technical assistance from the Department of Education and organizations and supporters of veterans assisting in these programs. The state board shall distribute the guidelines to every county board. The state board shall also distribute an appropriate program summary and contact information to the colleges and universities in the state so that they may establish similar programs for their students.

(d) County board policies. -- Each county board shall establish a policy for the implementation of a veteran's honors funeral assistant community service program that addresses at least the following:

(1) The distribution of information to music and band teachers for their use in notifying capable students and obtaining the consent of their parents or guardians for voluntary registry as a candidate able to sound Taps during military honors funerals held within a reasonable distance from their residence;

(2) The credit toward community service or work based learning requirements of the county or other recognition that will be awarded to a student for the registry and sounding of Taps during military honors funerals; and

(3) The limits on the amount of regular classroom instruction that a student may miss for the sounding of Taps during military honors funerals to fulfill a community service or work based learning requirement or, if none, on the excused absences that the student may accrue for this activity.

County boards are not responsible for any costs associated with the program, may not be required to provide or pay for student transportation to funerals and are not liable for student supervision while absent to participate in funerals. However, county boards are encouraged to collaborate with organizations of veterans and supporters of veterans to assist with the veteran's honors funeral assistant community service program.

**§18-2E-8f. Creating the "West Virginia Remembers Program;" rules.**

(a) There is hereby created the "West Virginia Remembers Program." The objective of the West Virginia Remembers Program is to provide a forum wherein children in the public schools may learn about military service, patriotism and courage in the defense of our country from veterans who volunteer to share their experiences in the educational setting. The state board shall promulgate a rule for implementation of the program, including, but not limited to, the following:

- (1) The program is not a part of the required curriculum;
- (2) Presentation of the program in any classroom is the option of the classroom teacher; and
- (3) A process is established for soliciting speakers from veterans groups and identifying available speakers.

**§18-2E-8g. Creating successful careers through agricultural education.**

(a) Findings and intent. — The Legislature finds that through agricultural education students are provided opportunities for leadership development, personal growth, and career success in the science, business, and technology of agriculture. Quality agricultural education instruction is delivered through three major components of classroom and laboratory instruction, supervised agricultural experience programs, and student leadership organizations such as the National Future Farmers of America (FFA) Organization. The Legislature further finds that opportunities to prepare for career success in the science, business, and technology of agriculture should be available to every West Virginia high school student.

(b) To provide opportunities for all state high school students to prepare for successful careers in agriculture and related fields, beginning in the 2020-2021 school year, school districts and multicounty vocational centers are encouraged to make available agricultural programs to high school students, including, but not limited to, such programs that would allow for and support the establishment of a local FFA chapter. Upon the request of any district or multicounty vocational center that does not have an agricultural program, the State Department of Education shall assist the district or multicounty vocational center in establishing agricultural programs available to high school students in the district. To the extent that funding is the primary reason that an agricultural program is not established, the State Department of Education shall report the same to the Legislative Oversight Commission on Education Accountability.

**§18-2E-9. West Virginia virtual school.**

(a) Findings: -- The Legislature finds that:

(1) West Virginia schools have improved and expanded Internet access which enables schools to offer courses through the Internet and other new and developing technologies;

(2) Current technology is available to provide students with more resources for learning and new and developing technologies offer even more promise for expanded learning opportunities;

(3) A number of states and other jurisdictions have developed Internet-based instruction which is available currently and which is being used by schools in this state;

(4) To educate better the students of West Virginia, more course and class offerings can be made available through technology, especially to students who are geographically disadvantaged;

(5) Virtual learning enables students to learn from remote sites, learn at times other than the normal school day and learn at a different pace and gives students access to courses that would not be available in their area;

(6) There is a need to assure that Internet-based courses and courses offered through new and developing technologies are of high quality; and

(7) The state and county school systems can benefit from the purchasing power the state can offer.

(b) The Legislature hereby creates the West Virginia virtual school. The West Virginia virtual school shall be located within the office of technology and information systems within the West Virginia Department of Education.

(c) The State Superintendent of Schools shall appoint the director of the West Virginia virtual school with the approval of the state board.

(d) The director of the West Virginia virtual school has the following powers and duties:

(1) To contract with providers for courses and other services;

(2) To review courses and courseware and make determinations and recommendations relative to the cost and quality of the courses and the alignment with the instructional goals and objectives of the state board;

(3) To develop policy recommendations for consideration by the state board, which may include, but not be limited to, the following:

- (A) Hardware and software considerations for the offering of courses on the Internet or other developing technologies;
  - (B) Standards of teachers and other school employees who are engaged in the activities surrounding the offering of courses on the Internet or other developing technologies;
  - (C) Sharing of resources with other agencies of government, both within and outside West Virginia, to facilitate the offering of courses on the Internet or other developing technologies;
  - (D) Methods for including courses offered on the Internet or through other developing technologies in alternative education programs;
  - (E) Methods for making courses offered on the Internet or through other developing technologies available for students receiving home instruction;
  - (F) Methods for brokering the courses offered on the Internet or through other developing technologies;
  - (G) Methods for applying for grants;
  - (H) Methods for employing persons who are the most familiar with the instructional goals and objectives to develop the courses to be offered on the Internet and through other developing technologies; and
  - (I) Proper funding models that address all areas of funding including, but not limited to, which county, if any, may include a student receiving courses on the Internet or through other developing technologies in enrollment and who, if anyone, is required to pay for the courses offered on the Internet or through other developing technologies; and
- (4) Any other powers and duties necessary to address the findings of the Legislature in subsection (a) of this section.
- (e) Subject to the process outlined in this section, the West Virginia virtual school's approved virtual and distance learning courses are exempt from the mandatory use of primary source instructional materials listed on the state multiple list.
- (f) The West Virginia Department of Education shall report the progress of the West Virginia virtual school to the Legislative Oversight commission on education accountability on or before September 1, 2000.

**§18-2E-10. Third Grade Success Act; multi-tiered system of support for early literacy and numeracy in kindergarten through grade three; pre-service and in-service teacher training; notice to parent or guardian; third grade retention policy with exceptions; interventions continuing in fourth grade for students below proficient.**

(a) This section shall be known and may be cited as the Third Grade Success Act.

(b) The Legislature finds that:

(1) In the early learning years, ensuring that each student masters the content and skills needed for mastery at the next grade level is critically important for student success;

(2) Students who do not demonstrate grade-level proficiency in reading and mathematics by the end of third grade become increasingly less likely to succeed at each successive grade level and often drop out of school prior to graduation;

(3) State board policy requires every school to establish a process for ensuring the developmental and academic progress of all students. This process is to be coordinated by a school student assistance team that reviews student developmental and academic needs that have persisted despite being addressed through instruction, multi-tiered system of support for intervention, and as applicable, supports for personalized learning. Ensuring the developmental and academic success of all students requires every school to implement, in an equitable manner, programs during and after the instructional day at the appropriate instructional levels that contribute to the success of students; and

(4) To ensure that all students read and perform mathematics proficiently by the end of third grade, a statewide comprehensive approach to early literacy and numeracy is required. This approach shall focus on intensive supports during the early learning years which include schools and engaged communities mobilized to remove barriers, expand opportunities, and assist parents in fulfilling their roles and responsibilities to serve as full partners in the success of their children.

(c) "Science of reading" means evidence-based reading instruction practices that address the acquisition of language, phonological and phonemic awareness, phonics and spelling, fluency, vocabulary, oral language, comprehension, and writing that can be differentiated to meet the needs of individual students.

(d) The state board shall, in accordance with §29A-3B-1 *et seq.* of this code, promulgate legislative rules as necessary to effectuate the provisions of this section. The rules shall provide for at least the following:

(1) Development of a statewide comprehensive, systemic approach to close the reading and mathematics achievement gaps by third grade, which targets school readiness, the attendance gap, science of reading instruction (phonics, phonemic awareness, vocabulary,

fluency, comprehension, and writing), summer learning loss, the use of screeners and/or benchmark assessments in English language arts and mathematics for students in grades kindergarten through three, and a multi-tiered system of support for students exhibiting a substantial reading or mathematics deficiency;

(2) Ensuring all West Virginia children have access to high-quality early learning experiences that focus on healthy learners as part of the school readiness model, resulting in increased populations of children on target for healthy development prior to entering first grade;

(3) Closing the attendance gap to certify West Virginia children attend school regularly and limit chronic absenteeism in the early grades;

(4) Providing assistance to county boards with the training and implementation of the science of reading training for all kindergarten through grade three educators, early childhood classroom assistant teachers, aides, paraprofessionals and any interventionists that a county board may choose to employ instead of an early childhood classroom assistant teacher, aides, or paraprofessionals pursuant to §18-5-18a(b) of this code;

(5) Assisting county boards in establishing and operating targeted, sustained extended day and extended year reading and mathematics programs to ensure grade level proficiency and battle summer learning loss;

(6) Establishing an approved list of screeners and/or benchmark assessments in English language arts and mathematics for students in grades kindergarten through three for the purpose of identifying students with a significant reading and/or mathematics deficiency. The screener and/or benchmark assessments shall be given in the first 30 days of the school year and repeated at mid-year and at the end of the school year to determine student progression in reading and mathematics in kindergarten through third grade;

(7) Establishing an approved list of dyslexia screeners to be administered to students no less than twice per year in kindergarten through third grade and any time students with identified deficiencies are not responding to interventions;

(8) Any student in kindergarten or grades one through three who exhibits a deficiency in reading at any time, based upon the screeners and/or benchmark assessments, and/or the comprehensive statewide student assessment, and any fourth-grade student promoted for good cause shall receive an individual reading improvement plan no later than 30 days after the identification of the reading deficiency. The reading improvement plan shall be created by the teacher, principal, other pertinent school personnel, and the parent(s) or guardians, and shall describe the research-based reading intervention services the student will receive to remedy the reading deficit. Each student shall receive intensive reading intervention until the student no longer has a deficiency in reading. Reading interventions may include evidence-based strategies frequently used to remediate reading deficiencies and includes, but is not limited to, individual instruction, small-group instruction, tutoring, mentoring, or

the use of technology that targets specific reading skills and abilities;

(9) Maximizing family engagement to result in the development of a culture of literacy and numeracy, which shall at least include:

(A) Providing parents or guardians with regular updates to inform them of their child's progress toward proficiency in reading and mathematics;

(B) Ensuring parents or guardians are informed of and have access to resources which they may utilize to improve their child's literacy and numeracy skills;

(C) Ensuring the parent or guardian is informed of the importance of their child being able to demonstrate grade level reading and mathematics skills by the end of the third grade and the measures that will be employed pursuant to this section to improve the reading and mathematics skills of children who are not meeting the standards; and

(D) The parent or guardian of any student in kindergarten through grade three who exhibits a deficiency in reading or mathematics at any time during the school year must be notified in writing no later than 15 days after the identification of the deficiency, and the written notification must include the following:

(i) That the student has been identified as having a deficiency in reading and/or mathematics;

(ii) A description of the proposed research-based reading and/or mathematics interventions and/or supplemental instructional services and supports that will be provided to the child to address the identified area(s) of deficiency;

(iii) Strategies for the parent or guardian to use at home to help their child succeed in reading and/or mathematics; and

(iv) That if the child's reading or mathematics deficiency is not corrected by the end of grade three, the child may not be promoted to grade four unless an exemption is met;

(10) Supporting high-quality schools and a workforce prepared to address early literacy and numeracy by the provision of professional development for administrators, kindergarten, first, second, and third grade teachers including, but not limited to, the following:

(A) The approved benchmark assessment and/or screener tools to ensure teachers have the knowledge and skill to administer the assessment and/or screener, analyze the data to inform instruction, and identify students exhibiting substantial deficiencies in reading or mathematics;

(B) Comprehensive training on the science of reading and numeracy instruction to ensure all kindergarten through grade three teachers, early childhood classroom assistant teachers, aides and paraprofessionals, have the knowledge and skill to teach and/or support all

students to read and perform mathematics at grade level. The rules also shall provide that any interventionist a county chooses to employ instead of an early childhood classroom assistant teacher, aides or paraprofessionals pursuant to §18-5-18a(b) receives this comprehensive training;

(C) Training and materials to inform classroom teachers of the characteristics of dyslexia and dyscalculia in students, components of benchmarks and screeners that may indicate dyslexia or dyscalculia, and strategies for instruction; and

(D) Job-embedded, on-site teacher training on evidence-based reading and mathematics instruction and data-driven decision-making that provides kindergarten through grade three teachers with immediate feedback for improving instruction;

(11) Ensuring the employment of qualified teachers and service personnel in accordance with §18-5-39 and §18A-4-7c of this code to provide instruction to students enrolled in early literacy and numeracy support programs including, but not limited to, ensuring that educator preparation programs prepare candidates seeking licensure for elementary education with training and instruction to:

(A) Include instruction in state-adopted grade-level content standards, foundational reading and mathematics skills, and how to implement reading instruction using high-quality instructional materials;

(B) Provide effective instruction and intervention for students with reading and math deficiencies, including students with characteristics of dyslexia or dyscalculia; and

(C) Understand and use student data to make instructional decisions;

(12) Creating a formula or grant-based program for the distribution of funds appropriated specifically for the purposes of this section or otherwise available for the support of a targeted, multi-tiered system of support intervention for early literacy and numeracy;

(13) Providing support for transportation and healthy foods for students required to attend after-school and extended year early literacy and numeracy instructional support programs and supervision at the school that accommodates the typical work schedules of parents; and

(14) Receiving from county boards any applications and annual reports required by rule of the state board.

(e) A student in grades kindergarten through grade three shall be required to attend an extended year early literacy and numeracy instructional support program as a condition for promotion if:

(1) The student has been provided additional academic assistance through interventions offered during the school day or after-school in early literacy and numeracy and, prior to the end of the school year, the student assistance team or the student's classroom teacher

recommends that further additional academic help is needed for the student to be successful at the next grade level; and

(2) The county board has established a literacy and numeracy instructional support program during the extended year for the student's grade level.

(f) County boards shall provide high-quality educational facilities, equipment, and services to support literacy and numeracy instructional support programs established pursuant to this section. Extended year programs may be provided at a central location for kindergarten through third graders who qualify for the program.

(g) Each county board shall adopt high-quality instructional materials grounded in scientifically-based reading research and aligned to state standards to be used as the core curriculum. The instructional materials shall not include practices that are aligned with the Three-Cueing Systems Model of teaching reading.

(h) This section may not be construed to prohibit a classroom teacher from recommending the grade level retention of a student in any of the grades kindergarten through grade three based upon the student's lack of mastery of the subject matter and preparation for the subject matter at the next grade level. Benchmark and/or screener data shall be used to inform the classroom teacher's recommendation.

(i) This section may not be construed to affect the individualized education plans of exceptional students.

(j) This section may not be construed to limit the authority of the county board to establish an extended year program in accordance with §18-5-39 of this code. County boards may not charge tuition for enrollment in early literacy and numeracy instructional support programs established pursuant to this section.

(k) Each county board shall implement the provisions of this section and the provisions of the state board rule required by subsection (b) of this section. The county board shall establish a process for ensuring the developmental and academic progress of all students through the auspices of student assistance teams as currently required by state board policy and perform a needs assessment to determine the potential capacity requirements for the multi-tiered system of support for early learners. Each county board also shall provide in-service training:

(1) For kindergarten through grade three early childhood classroom assistant teachers, aides and paraprofessionals, specifically related to literacy, numeracy, and their responsibilities and appropriate measures for exercising authority and control over students. The county board shall also provide this training to any interventionists it chooses to employ instead of an early childhood classroom assistant teacher, aide or professional pursuant to §18-5-18a(b) of this code; and

(2) For classroom teachers in grades kindergarten through three to help the classroom teachers gain a strong understanding of how to best utilize the early childhood classroom assistant teachers, aides, paraprofessionals or interventionists during classroom instruction and during other periods of the day.

(l) The state board shall provide a report describing the proposed implementation of the multi-tiered system of support for early literacy and numeracy to the Legislative Oversight Commission on Education Accountability on or before July 1, 2023.

(m) The state board shall provide a comprehensive report regarding the status of the multi-tiered system of support for literacy and numeracy to the Legislative Oversight Commission on Education Accountability, the Joint Committee on Government and Finance, and the Governor on or before November 1, 2023, and annually on or before November 1 of each year thereafter. The report shall address, at a minimum, the progress of the program throughout the state, its effect on student achievement, and the sources of the funding both available to and used by the program.

(n) Legislative appropriations to the State Board of Education - State Department of Education Elementary Literacy and Numeracy Program shall be used for the implementation of the provisions of this section along with other funds available for providing a high-quality education.

(o) Effective for the school year beginning July 1, 2026, and thereafter, a public school student who generally demonstrates a minimal understanding of, and ability to apply, grade level English language arts or mathematics knowledge, skills, and abilities, or both, as indicated on the West Virginia General Summative Assessment relative to the West Virginia College and Career Readiness Standards at the end of third grade, shall upon the recommendation of the teacher and the student assistance team, be retained in the third grade for the ensuing school year subject to the following exceptions:

(1) A student with disabilities whose Individual Education Plan indicates participation in the statewide alternate summative assessment;

(2) A student identified as an English language learner who has had less than three years instruction in English as a second language;

(3) A student with disabilities who participates in the statewide summative assessment, has an Individual Education Plan or Section 504 plan that reflects that the student has received intensive intervention for more than two years and still demonstrates a deficiency or who was previously retained in any of the grades kindergarten through grade three;

(4) A student who is in the process of a special education referral or evaluation for placement in special education, has been diagnosed as having a significant impairment, including dyslexia or dyscalculia, or is a child with a disability if the student's individualized education program team and the student's parent or guardian agree that promotion is

appropriate based on the student's Individualized Education Plan;

(5) A student who has received intensive intervention for two or more years, still demonstrates a deficiency, and who was previously retained in any of the grades kindergarten through grade three for a total of two years: *Provided*, That the student shall continue to receive intensive intervention in grade four;

(6) A student who demonstrates an acceptable level of performance on an alternative standardized assessment approved by the state board;

(7) A student who attends an extended year learning program following the third grade and has attained proficiency; and

(8) A student whose parent or guardian has requested a good cause exemption within the time period established by the county board and the superintendent, or his or her designee, determines that the good cause exemption is in the best interests of the child: *Provided*, That a good cause exemption may not prohibit the grade level retention of a student by a classroom teacher based upon the student's lack of mastery of the subject matter and preparation for the subject matter at the next grade level.

**§18-2E-11. Advanced Career Education.**

(a) The Legislature hereby makes the following findings:

(1) Preparing West Virginia students to achieve post-secondary career education and to excel in the workforce is a responsibility shared among all state education agencies and institutions. The state's education agencies and institutions can fulfill this responsibility by establishing partnerships that enable students to attain advanced career education and valuable workforce skills in a more efficient and advantageous manner;

(2) The formation of partnerships between public secondary schools and community and technical colleges or public or not-for-profit private baccalaureate institutions which establish advanced career education programs would ensure that a full range of community and technical college programs and services are provided in all areas of the state;

(3) Programs which create clear and efficient pathways that begin during secondary education and lead to obtaining advanced certifications and associate degrees will increase the number of students that ultimately obtain a post-secondary credential or degree; and

(4) West Virginia's economic prosperity is directly tied to the level and quality of its workforce career education. Providing the students of this state with increased access to career education will not only improve the general well-being of its citizens, but greatly enhance the economic prosperity of the state.

(b) The purpose of this section and the Advanced Career Education (ACE) programs authorized herein is to connect secondary schools with community and technical colleges or public or not-for-profit private baccalaureate institutions that provide associate degrees to accomplish the following:

(1) Prepare secondary students for success in post-secondary education and the workforce; and

(2) Provide more opportunities for secondary students to earn post-secondary college credits, certifications, and associate degrees.

(c) To effectuate the purposes set forth in §18-2E-11(b) of this code, community and technical colleges, public or not-for-profit private baccalaureate institutions, career technical education centers, and county boards of education, or any combination of such secondary and postsecondary entities, shall establish partnerships that provide for ACE programs which feature defined pathways that begin when a student is in secondary education and that ultimately lead to advanced certifications or associate degrees awarded by community and technical colleges or baccalaureate institutions. ACE programs shall be equally available to public, nonpublic, and homeschool students.

(d) ACE programs shall include pathways that consist of a curriculum of courses leading to advanced certifications or an associate degree that have been deemed to satisfy a workforce

need as determined by the Department of Commerce.

(1) The Department of Commerce shall, on occasion, but at least annually, provide written notification to the State Board of Education, the West Virginia Council for Community and Technical College Education and the West Virginia Higher Education Policy Commission of a determination of areas of workforce need within the state.

(2) The Department of Commerce, in consultation with the council, the commission, and business partners, shall develop a hierarchy of high demand skilled professions and workforce needs with shortages, which shall be given priority in administration of the program.

(e) The State Superintendent of Schools, the Chancellor of the Council for Community and Technical College Education, and the Chancellor of the Higher Education Policy Commission, or their designees, shall facilitate the ACE programs. At a minimum, an ACE program shall satisfy the following objectives:

(1) Provide additional opportunities to students in this state to attain advanced certifications and college credentials leading to associate degrees through ACE pathways;

(2) Increase the number of students in this state that attain advanced certifications and college credentials leading to associate degrees through ACE pathways;

(3) Allow students in this state to attain advanced certifications and college credentials leading to associate degrees through ACE pathways at little or no cost;

(4) Ensure that ACE pathways provide a clear roadmap to the courses and requirements necessary to attain advanced certifications and college credentials leading to associate degrees; and

(5) Ensure that course requirements within ACE pathways are not duplicated.

(f) The board and council shall jointly promulgate guidelines for the administration of ACE programs and pathways, which must be affirmatively adopted by the board and the council. At a minimum, such guidelines shall provide for the following:

(1) That ACE program partnerships established between community and technical colleges, public or not-for-profit private baccalaureate institutions, career technical education centers, and county boards of education, or any combination of such secondary and postsecondary entities, shall be reduced to written partnership agreements;

(2) The information required to be contained within partnership agreements;

(3) That ACE programs and pathways shall meet the requirements of the accrediting entity for the community and technical college or public or not-for-profit private baccalaureate institution awarding the associate degrees or advanced certificates;

(4) That partnership agreements shall be approved by the State Superintendent of Schools, the Chancellor for the Council for Community and Technical College Education and the Chancellor of the Higher Education Policy Commission; and

(5) Any other provisions necessary to effectuate the purposes of this section.

(g) The board and the council shall maintain and annually report to the Governor and the Legislative Oversight Commission on Education Accountability the following information about ACE programs:

(1) The identity and number of partnership agreements;

(2) The ACE programs and pathways that are being utilized by career technical education centers, county boards of education, community and technical colleges, and public or not-for-profit private baccalaureate institutions; and

(3) The nature and number of degrees and certifications awarded to students participating in ACE programs by each community and technical college, public or not-for-profit private baccalaureate institution and career technical education center.

**§18-2E-11a. Nursing career pathway.**

(a) The Legislature finds that:

(1) There are numerous reports relating that the nursing shortage is causing currently employed nurses to be overworked and that hospitals are bringing in travel nurses from other states;

(2) While the recent passage of the Advance Career Education and West Virginia Invests Grant programs legislation would address nursing shortages along with addressing other shortage areas, having a sufficient number of qualified nurses is of such importance to the health of the citizens of the state that additional efforts should be made to ensure that there is an adequate number of nurses to meet the state's health care needs as soon as possible; and

(3) Providing a seamless process for students pursuing careers in nursing from high school through attainment of a nursing credential or degree would assist in ensuring an adequate nursing workforce.

(b) The State Superintendent of Schools, the Chancellor for the Higher Education Policy Commission, and the Chancellor for the Community and Technical College System shall convene the West Virginia Nursing Career Pathway Workgroup consisting of:

(1) Representatives of health care providers that need nurses and could potentially provide clinical space. Due to the importance of health care providers providing clinical space, as many representatives of health care providers as possible, especially the largest health care providers, shall be invited to be members of the workgroup, provide input, and be encouraged to provide clinical space. Invitations to join the workgroup at least shall be extended to the West Virginia Health Care Association and the West Virginia Hospital Association;

(2) A representative of the West Virginia Department of Education;

(3) A representative of the Higher Education Policy Commission;

(4) A representative of the Council for Community and Technical College Education;

(5) Representatives of institutions of higher education in West Virginia;

(6) A representative of the Board for Registered Professional Nurses;

(7) A representative of the Board of Examiners for Licensed Practical Nurses; and

(8) Any other persons that the State Superintendent, the Chancellor for Higher Education, and the Chancellor for Community and Technical College Education determine beneficial.

(c) The West Virginia Nursing Career Pathway Workgroup shall be charged with developing a career pathway to address the unmet need for nursing assistants, licensed practical nurses, registered nurses, and registered nurses with a bachelor's degree in nursing. The nursing program of study will begin in high school and progress through college, providing employment opportunity with industry partners and pathway re-entry at specified student attainment points: Nursing assistant certification, licensed practical nurse diploma and licensure, registered nurse associate degree and licensure, and bachelor of science in nursing completion. The career pathway shall align affordable, effective, and sustainable secondary to post-secondary nursing programs to increase credential attainment for a broad and diverse student population.

(1) The career pathway shall include participating high school students enrolling in a specified curriculum of college preparatory, career and technical health science courses, or dual college-high school credit courses, as well as participating in career experiences through a health care provider or a work-based learning clinical experience.

(2) Students shall have the opportunity to apply for admission to a practical nursing program at a community and technical college or career and technical education center.

(3) Upon completion of a practical nursing program, students shall have the opportunity to apply for admission to a licensed practical nursing to registered nurse associate degree program.

(4) Upon completion of a licensed practical nursing to registered nurse associate degree program, students then shall have the opportunity to apply for admission to a registered nurse to bachelor of science in nursing program.

(5) The career pathway shall be made available to students statewide beginning with the cohort of students entering ninth grade during the 2021-2022 school year.

(d) The State Superintendent, the Chancellor for Higher Education, the Chancellor for Community and Technical College Education, or any combination thereof, shall report to the Legislative Oversight Commission on Education Accountability, as requested, but at least annually, on the progress in implementing the career pathway up until such time as the career pathway is fully implemented statewide.

(e) In establishing the nursing career pathway, the State Superintendent, the Chancellor for Higher Education, the Chancellor of Community and Technical College Education, and the workgroup created pursuant to subsection (c) of this section shall consider the following:

(1) If the career pathway is difficult to implement due to nursing programs being at full capacity, the workgroup shall explore the use of online programs currently in existence or the creation of new online programs in overcoming any lack of capacity in the current nursing programs and to make programs more accessible to students; and

(2) The nursing career pathway shall include the use of any available financial assistance in order to minimize, or if possible, eliminate tuition costs for students and their families. This assistance can include, if a student is eligible, the Federal Pell Grant Program, the Higher Education Grant Program, the PROMISE Scholarship Program, the West Virginia Invests Grant Program, and any other grants or scholarships that might be available. Health care providers in need of nurses also shall be encouraged to establish scholarship programs to help cover tuition costs.

WV Legislature

**§18-2E-12. Mountain State Digital Literacy Project.**

(a) Beginning for the school year 2020-2021, the state board shall implement a pilot project, hereby designated the Mountain State Digital Literacy Project. The state board shall determine the number of schools eligible to participate in the pilot project and may adjust that number on a yearly basis. The state board shall select the schools to participate in the project, but selected schools shall possess varying geographic and demographic characteristics and serve students in grades K-8.

(b) Subject to legislative appropriation for this purpose, schools participating in the project shall be provided with instructional resources for students and teachers that feature an extensive curriculum related to digital literacy, online assessment preparation, and internet safety. Administrators and teachers at the participating schools shall be provided access to online digital literacy related professional development and support.

(c) The project shall be designed and implemented to compliment and build upon the digital literacy standards and assessments established pursuant to §18-2-12, §18-2E-5(c)(16), and §18-2E-5(d)(5) of this code.

(d) The state board may contract with a third-party to facilitate the project. Any such third-party shall satisfy the following qualifications:

- (1) Possesses demonstrable experience facilitating similar digital literacy initiatives with public school systems;
- (2) Provides extensive digital literacy content over the internet that may be adapted to age or grade specific users and assessment tools, and integrates with widely used platforms; and
- (3) Provides digital literacy-related professional development and support resources for administrators and teachers.

(e) On or before January 1, 2020, the state board shall submit to the Governor and the Legislative Oversight Committee on Education Accountability a report that provides information on the development, structure, and fiscal estimate of the Mountain State Digital Literacy Project.

(f) On or before January 1, 2025, the state board shall submit to the Governor and the Legislative Oversight Committee on Education Accountability an evaluation of the pilot project's impact on the performance and progress of students at the participating schools. The evaluation shall include a recommendation for pilot project continuation, expansion or termination and, if recommended for continuation or expansion, any recommendations for program modifications and utilization of the successful participating schools as demonstration sites to facilitate program expansion.

**§18-2E-13. Establishment of vocational math class.**

(a) Legislative findings and purpose. - The Legislature find that empowering students to enter the trades is of paramount importance. Restructuring current math programming to assist students for a career in the trades is the best way to achieve this goal. The restructuring of the technical transition math class to help students with workforce math will provide students with the opportunity to prepare themselves for a career in the trades.

(b) Enactment. - There is hereby established for all public-school curriculum in West Virginia a technical transition math class geared towards students interested in careers in the trades. This class will pertain to math curriculum in the fields of fractions, conversion from fractions to decimals, application of measurement, reading blueprints, geometry pertaining to workforce math and other math skills needed to succeed in the trades.

(c) Qualifications. - In order to be able to teach this class, an instructor must meet the same qualifications as needed to teach current trade classes and specific content in the public schools. Students shall be eligible for this class once entering high school. This class can be taken as a personalized math credit to meet graduation requirements.
