WEST VIRGINIA CODE: §18B-3D-1

§18B-3D-1. Legislative findings and intent.

The Legislature finds that community and technical colleges play a critical role in West Virginia's economic development by providing the skilled workforce necessary for businesses and industries to thrive in a competitive global economy. Rapid changes in technology, industry practices, and employer needs require that these institutions have the flexibility and resources to respond quickly and effectively to workforce demands.

It is the intent of the Legislature to provide funding that enables community and technical colleges to develop and deliver workforce training programs that meet the evolving needs of West Virginia employers, support economic growth, and provide pathways to high-wage employment for West Virginia residents.
