The permittee shall publish an advertisement regarding the request for release in the same manner as is required of advertisements for permit applications. A copy of the advertisement shall be submitted to the secretary as part of any bond release application and shall contain a notification of the precise location of the land affected, the number of acres, the permit and the date approved, the amount of the bond filed and the portion sought to be released, the type and appropriate dates of reclamation work performed and a description of the results achieved as they relate to the permittee's approved reclamation plan. In addition, as part of any bond release application, the permittee shall submit copies of letters which the permittee has sent to adjoining property owners, local government bodies, planning agencies, sewage and water treatment authorities or water companies in the locality in which the surface mining operation is located, notifying them of the permittee's intention to seek release from the bond. (b) Upon receipt of the application for bond release, the secretary, within thirty days, taking into consideration existing weather conditions, shall conduct an inspection and evaluation of the reclamation work involved. The secretary shall notify the permittee in writing of his or her decision to release or not to release all or part of the bond or deposit within sixty days from the date of the initial publication of the advertisement if no public hearing is requested. If a public hearing is held, the secretary's decision shall be issued within thirty days thereafter.

thirteen of this article. No part of the bond or deposit shall be released under this subsection so long as the lands to which the release would be applicable are contributing suspended solids to streamflow or runoff outside the permit area in excess of the requirements set by subdivision (10), subsection (b), section thirteen of this article or until soil productivity for prime farm lands has returned to equivalent levels of yield as nonmined land of the same soil type in the surrounding area under equivalent management practices as determined from the soil survey performed pursuant to subdivision (15), subsection (a), section nine of this article. Where a silt dam is to be retained as a permanent impoundment pursuant to subdivision (8), subsection (b), section thirteen of this article, the portion of bond may be released under this subdivision so long as provisions for sound future maintenance by the operator or the landowner have been made with the secretary.
