

# WEST VIRGINIA CODE: §22-4-12

## **§22-4-12. Preblast survey requirements.**

(a) For all new permits issued after the effective date of this section, at least thirty days prior to commencing blasting, an operator or an operator's designee shall make the following notifications in writing to all owners and occupants of protected structures that the operator or operator's designee will perform preblast surveys in accordance with subsection (f) of this section. The required notifications shall be to all owners and occupants of protected structures within one thousand five hundred feet of the blasting area.

(b) For quarries in operation as of the effective date of this section, the quarry operator within one year, shall conduct a preblast survey of the first protected structure within one thousand feet of the blasting area. Any property owner may, at their own expense, pay for a preblast survey meeting the provisions of this article, for his or her protected structure to assess the impact of future blasts to those dwellings or structures by an existing quarry.

(c) An occupant or owner of a man-made dwelling or structure within the areas described in subsection (a) of this section, may waive the right to a preblast survey in writing. If a dwelling is occupied by a person other than the owner, both the owner and the occupant must waive the right to a preblast survey in writing. If an occupant or owner of a man-made dwelling or structure refuses to allow the operator or the operator's designee access to the protected structure and refuses to waive in writing the right to a preblast survey or to the extent that access to any portion of the structure, underground water supply or well is impossible or impractical under the circumstances, the preblast survey shall indicate that access was refused, impossible or impractical. The operator or the operator's designee shall execute a sworn affidavit explaining the reasons and circumstances surrounding the refusals.

(d) If a preblast survey was waived by the owner and was within the requisite area and the property is sold, the new owner may request a preblast survey from the operator.

(e) An owner within the requisite area may request, from the operator, a preblast survey on structures constructed after the original preblast survey.

(f) The preblast survey shall include:

(1) The names, addresses or description of structure location and telephone numbers of the owner and the residents of the structure being surveyed and the structure number from the permit blasting map;

(2) The current home insurer of the owner and the residents of the structure;

(3) The names, addresses and telephone numbers of the operator and the permit number;

- (4) The current general liability insurer of the operator;
- (5) The name, address and telephone number of the person or firm performing the preblast survey;
- (6) The current general liability insurer of the person or firm performing the preblast survey;
- (7) The date of the preblast survey and the date it was mailed or delivered to the director;
- (8) A general description of the structure and its appurtenances including, but not limited to:  
(A) The number of stories; (B) the construction materials for the frame and the exterior and interior finish; (C) the type of construction including any unusual or substandard construction; and (D) the approximate age of the structure;
- (9) A general description of the survey methods and the direction of progression of the survey, including a key to abbreviations used;
- (10) Written documentation and drawings, videos or photographs of the preblast defects and other physical conditions of all structures, appurtenances and water sources which could be affected by blasting;
- (11) Written documentation and drawings, videos or photographs of the exterior and interior of the structure to indicate preblast defects and condition;
- (12) Written documentation and drawings, videos or photographs of the exterior and interior of any appurtenance of the structure to indicate preblast defects and condition;
- (13) Sufficient exterior and interior photographs or videos, using a variety of angles, of the structure and its appurtenances to indicate preblast defects and the condition of the structure and appurtenances;
- (14) Written documentation and drawings, videos or photographs of any unusual or substandard construction technique and materials used on the structure and/or its appurtenances;
- (15) Written documentation relating to the type of water supply, including a description of the type of system and treatment being used, an analysis of untreated water supplies, a water analysis of water supplies other than public utilities, and information relating to the quantity and quality of water;
- (16) When the water supply is a well, written documentation, where available, relating to the type of well; the well log; the depth, age and type of casing or lining; the static water level; flow data; the pump capacity; the drilling contractor; and the source or sources of the documentation;
- (17) A description of any portion of the structure and appurtenances not documented or

photographed and the reasons;

(18) The signature of the person performing the survey; and

(19) Any other information required by the director which additional information shall be established by rule in accordance with article three, chapter twenty-nine-a of this code.

(g) The director may require a preblast survey as a condition of a major permit modification, upon a finding that the proposed blasting area will occur within one thousand five hundred feet from a protected structure, and will be of a nature and intensity to potentially cause blasting damage.
