WEST VIRGINIA CODE: §29-24-1

§29-24-1. Legislative findings and declarations.

Individuals with disabilities comprise a significant and increasing percentage of West Virginia's population. The Legislature finds and declares that action is necessary to assist these individuals in their homes, schools, employment and communities to become more independent citizens of the state. Many of these individuals require technology-related devices and technology-related services in order to perform functions, such as caring for themselves, performing manual tasks, mobility, seeing, hearing, speaking, breathing and learning in order to have the ability to more independently participate in society and the work force. In order to meet the present and increasing needs of West Virginians for technology-related devices and technology-related services, it is necessary for the state to provide funds for the technology-related revolving loan fund for individuals with disabilities that neither supplant nor replace existing state, federal or private sector funds.
