

# WEST VIRGINIA CODE: §31D-6-621

## **§31D-6-621. Issuance of shares.**

(a) The powers granted in this section to the board of directors may be reserved to the shareholders by the articles of incorporation.

(b) The board of directors may authorize shares to be issued for consideration consisting of any tangible or intangible property or benefit to the corporation, including cash, promissory notes, services performed, contracts for services to be performed or other securities of the corporation.

(c) Before the corporation issues shares, the board of directors must determine that the consideration received or to be received for shares to be issued is adequate. That determination by the board of directors is conclusive insofar as the adequacy of consideration for the issuance of shares relates to whether the shares are validly issued, fully paid and nonassessable.

(d) When the corporation receives the consideration for which the board of directors authorized the issuance of shares, the shares issued are fully paid and nonassessable.

(e) The corporation may place in escrow shares issued for a contract for future services or benefits or a promissory note, or make other arrangements to restrict the transfer of the shares, and may credit distributions in respect of the shares against their purchase price until the services are performed, the note is paid or the benefits received. If the services are not performed, the note is not paid or the benefits are not received, the shares escrowed or restricted and the distributions credited may be canceled in whole or in part.

(f) An issuance of shares or other securities convertible into or rights exercisable for shares, in a transaction or a series of integrated transactions, requires approval of the shareholders at a meeting at which a quorum exists consisting of at least a majority of the votes entitled to be cast on the matter, if:

(1) The shares, other securities or rights are issued for consideration other than cash or cash equivalents; and

(2) The voting power of shares that are issued and issuable as a result of the transaction or series of integrated transactions will comprise more than twenty percent of the voting power of the shares of the corporation that were outstanding immediately before the transaction.

(g) As used in subsection (f) of this section:

(1) For purposes of determining the voting power of shares issued and issuable as a result of a transaction or series of integrated transactions, the voting power of shares is the greater of: (A) The voting power of the shares to be issued; or (B) the voting power of the shares that

would be outstanding after giving effect to the conversion of convertible shares and other securities and the exercise of rights to be issued.

(2) A series of transactions is integrated if consummation of one transaction is made contingent on consummation of one or more of the other transactions.
