(2) "Established patient" means a patient who has received professional services, face-to-face, from the physician, qualified health care professional, or another physician or qualified health care professional of the exact same specialty and subspecialty who belongs to the same group practice, within the past three years.

(3) "Health care practitioner" means a person licensed under §30-1-1 et seq. of this code who provides health care services.

(4) "Originating site" means the location where the patient is located, whether or not accompanied by a health care practitioner, at the time services are provided by a health care practitioner through telehealth, including, but not limited to, a health care practitioner's office, hospital, critical access hospital, rural health clinic, federally qualified health center, a patient's home, and other nonmedical environments such as school-based health centers, university-based health centers, or the work location of a patient.

(5) "Remote patient monitoring services" means the delivery of home health services using telecommunications technology to enhance the delivery of home health care, including monitoring of clinical patient data such as weight, blood pressure, pulse, pulse oximetry, blood glucose, and other condition-specific data; medication adherence monitoring; and interactive video conferencing with or without digital image upload.

(6) "Telehealth services" means the use of synchronous or asynchronous telecommunications technology or audio only telephone calls by a health care practitioner to provide health care services, including, but not limited to, assessment, diagnosis, consultation, treatment, and monitoring of a patient; transfer of medical data; patient and professional health-related education; public health services; and health administration. The term does not include e-mail messages or facsimile transmissions.
