WEST VIRGINIA CODE: §55-7B-3

§55-7B-3. Elements of proof.

- (a) The following are necessary elements of proof that an injury or death resulted from the failure of a health care provider to follow the accepted standard of care:
- (1) The health care provider failed to exercise that degree of care, skill and learning required or expected of a reasonable, prudent health care provider in the profession or class to which the health care provider belongs acting in the same or similar circumstances; and
- (2) Such failure was a proximate cause of the injury or death.
- (b) If the plaintiff proceeds on the "loss of chance" theory, i.e., that the health care provider's failure to follow the accepted standard of care deprived the patient of a chance of recovery or increased the risk of harm to the patient which was a substantial factor in bringing about the ultimate injury to the patient, the plaintiff must also prove, to a reasonable degree of medical probability, that following the accepted standard of care would have resulted in a greater than twenty-five percent chance that the patient would have had an improved recovery or would have survived.
