WEST VIRGINIA CODE: §5b-2J-2

§5B-2J-2. Legislative findings; declaration of public policy.

(a) The Legislature finds that:

(1) The advent and advancement of new and existing technologies and drilling practices have created the opportunity for the efficient development of natural gas, including natural gas liquids such as ethane, propane, butane, isobutane and pentanes, contained in underground shales and other geological formations.

(2) With the development of natural gas liquids from shales and other geological formations comes the opportunity for economic development in related areas of the economy including, but not limited to, manufacturing, transmission and storage of natural gas liquids and related products, the use of such products in manufacturing, the consumption of such products, and the transportation of manufactured products.

(3) Producers of natural gas liquids, transporters and storers of natural gas liquids, and manufacturers of products using natural gas liquids face a significant number of regulatory requirements, some of which may be redundant, inconsistent, or overlapping. Agencies should work together, where practical, to avoid duplication, promote better coordination and reduce these requirements, thus reducing costs, simplifying and harmonizing rules, and streamlining regulatory oversight.

(4) In developing regulatory actions and identifying appropriate approaches, agencies should attempt to promote coordination, simplification, and harmonization.

(5) Agencies should also seek to identify, as appropriate, means to achieve regulatory goals that are designed to promote innovation.

(6) Agencies should review their existing significant legislative, interpretive and procedural rules to determine whether any such rules should be modified, streamlined, expanded or repealed so as to make the agency's regulatory program more effective and less burdensome in achieving the regulatory objectives.

(7) The West Virginia Economic Development Authority established in §31-15-1 *et seq*. of this code, the West Virginia Infrastructure and Jobs Development Council created in §31-15a-1 et seq., of this code and the Office of Energy created under § 5B-2F-1 et seq. of this code, should, where appropriate, provide assistance that grows or sustains the natural gas liquids segment of the economy.

(b) The Legislature declares that facilitating the development of business activity directly and indirectly related to development, transportation, storage and use of the natural gas liquids serves the public interest of the citizens of this state by promoting economic
