§5B-1B-1. Southern West Virginia Lake Development Study Commission Act.

This article shall be known as the “Southern West Virginia Lake Development Study Commission Act.”

WV Legislature

§5B-1B-2. Legislative findings.

(a) The Legislature finds that the southern coalfields of West Virginia, long one of the most productive coal producing areas of the world, having provided untold millions of dollars to the state economy, and having been the financial backbone of the state's economy for over a century, is now in the midst of a long decline in coal production and population, and because of rugged terrain and remoteness from surrounding regions, suffers from high unemployment and deteriorating infrastructure and economic base, and requires innovative and alternative approaches to revitalization; and therefore demands the Legislature look at innovative ideas and alternatives for new industries and businesses that provide sustainable long term development for southern West Virginia.

(b) The natural beauty of the mountainous regions, now popular with outdoor enthusiasts for its Hatfield McCoy Trail System, would be an ideal location for a large recreational lake or lakes, constructed with hundreds of miles of lake front property, tens of thousands of acres of lake surface, near a four lane highway and situated near large tracts of developable property, with carefully considered design and development, could create a new and exciting recreational area of the state, and provide a myriad of opportunities for further development and with creative initiative could revitalize this area of our state. Such a proposal is worthy of careful study and marshalling the forces of our state and federal governments to thoroughly evaluate and consider this development, maximizing the design and use of a lake or lake system to provide a variety of benefits, potentially including hydro-electric generation, resort developments, housing, and economic opportunities that would create diversity and renewal to this long neglected and deserving area of our state.

The microgrid district's load not covered by a contract shall be considered non-firm and interruptible. The commission shall issue a final order determining the terms of a special contract within 90 days of filing of a petition.

§5B-2-21a. Data Centers.

(a) Findings and purpose. — The Legislature hereby finds and declares the following:

(1) Data centers represent a significant and growing sector of the economy, generating substantial economic activity, including jobs, infrastructure investments, and technological innovation.

(2) Data centers are critical national infrastructure that require abundant, low-cost energy to protect sensitive data, operate high-level computation assets, and ensure the resilience of the digital economy.

(3) The People's Republic of China is positioning itself to be the global leader of data centers and is investing in technology to encourage the flow of data toward China instead of toward the United States.

(4) It is in the United States' national security interests to limit the flow of data to China and to protect the flow of data and maximize computational power inside the United States. The President has declared that it is the policy of the United States "to sustain and enhance America's global AI dominance in order to promote human flourishing, economic competitiveness and national security." Removing Barriers to American Leadership in Artificial Intelligence, Executive Order 14179 (Jan 23, 2025).

(5) As of early 2025, the highest concentration of high-level computational power and data centers in the world is located in Loudoun County, Virginia. This severe concentration of data centers in one location is a national security vulnerability because it invites the potential for cyberattacks and espionage against the Nation's critical data infrastructure.

(6) Data centers have historically obtained their electricity from the electric grid. Some data center developers now seek or require the use of microgrids to provide their primary and backup power.

(7) West Virginia is strategically positioned as the best location in the United States to place data centers due to: (A) its close proximity to Washington, D.C., and the federal government; (B) its close proximity to the majority of the Nation's population; (C) its low tax rates; (D) it having the least restrictive regulatory environment in the Nation; (E) its supply of abundant energy and natural resources to power the data centers; (F) its supply of resources, such as coal mine methane blended with natural gas, to assist data centers locating in West Virginia to meet their energy needs and environmental goals; and (G) its skilled and loyal workforce that has some of the lowest turnover rates in the Nation.

As such, the state has a significant interest in encouraging the development and expansion of data centers, which can serve as drivers of broader economic growth. The Legislature finds that these externalities transcend local borders, including environmental concerns, energy consumption, and regional economic growth. Additionally, the provisions in this

section align with the Legislature's goal of fostering a competitive, forward-thinking economy that benefits all residents.

(b) Program established. — The High Impact Data Center Program is hereby created and is to be administered as a program within the Division of Economic Development to encourage the continued development, construction, operation, maintenance, and expansion in West Virginia of high impact data centers. In order to effectuate the purposes of this section, the Division of Economic Development, or any agency, division, or subdivision thereof, may promulgate legislative rules, including emergency rules, in accordance with §29A-3-1 *et seq.* of this code.

(c) Notification. — Any data center shall compare its current or planned operations against the definition of "high impact data center" established in §11-6N-2 of this code and provide notification to the Division of Economic Development when the data center becomes aware that it will satisfy or has satisfied that definition. The notification will include information addressing the elements of that definition, including known or expected power consumption of the data center. This notification shall be made (1) within 30 days after the data center determines that it meets these requirements, or (2) when the data center reasonably anticipates that it will, at some future date, meet these requirements, in which case the data center may provide that anticipated future date in its notification.

(d) Certification. — The Secretary of the Department of Commerce shall identify and certify high impact data centers in this state upon a finding that a data center satisfies the requirements for the definition of "high impact data center" set forth in §11-6N-2 of this code. The Secretary shall issue confirmation of certification to a high impact data center within 14 days following receipt of the notification from the data center required by this section.

(e) Recordkeeping. — Any information provided by a data center pursuant to this section that is identified by the data center as confidential business information shall be exempt from the Freedom of Information Act. The Secretary shall take reasonable and appropriate steps to protect this information. Notwithstanding the foregoing, the Secretary shall maintain a complete list of all certified high impact data centers and all relevant information that can be made available to the Governor and Legislature, removing specifically identifying information to ensure confidentiality of any such information as identified by any high impact data center.

§5B-2-21b. Authority to assist certified microgrid district projects and certified high impact data center projects; legislative findings.

(a) Findings and purpose. — The Legislature hereby finds and declares the following:

(1) The findings and purpose set forth in §5B-2-21a(a) (2025), except to the extent expressly modified herein, are hereby incorporated herein by reference with the same force and effect as though fully set forth herein.

(2) It is in the best interests of the state to induce and assist in development of these projects, in order to advance the public purposes of relieving unemployment by preserving and creating jobs, and preserving and creating new and greater sources of revenue for the support of public services provided by the state and local government.

(3) It is the intent of the Legislature to occupy the whole field of the creation and regulation of certified microgrid districts and certified high impact data centers. The stated purpose of this section is to promote uniform and consistent application of the act within the state.

(b) The Department of Commerce shall assist projects developing or operating a certified microgrid district pursuant to §5B-2-21 of this code or a certified high impact data center pursuant to §5B-2-21a of this code. The Secretary of Commerce shall designate one of their personnel as "Data Economy Liaison" to serve as a single point-of-contact for certified microgrid districts and high impact data centers to assist coordinate and expedite their development and operation, including, but not limited to site selection and permitting. A "certified microgrid district" is a microgrid project, regardless of stage of development or operation, that has been certified by the Secretary of the Department of Commerce as set forth in §5B-2-21 of this code. A "certified high impact data center" is a data center project, regardless of stage of development or operation, that has been certified by the Secretary of the Department of Commerce as set forth in §5B-2-21a of this code.

(c) This section prohibits:

(1) Counties and municipalities, whether by ordinance, resolution, administrative act, or otherwise, from enacting, adopting, implementing, or enforcing ordinances, regulations, or rules which limit, in any way, the creation of, and acquisition, construction, equipping, development, expansion, and operation of any certified microgrid district or certified high impact data center project; and

§5B-2A-1. Legislative findings and declaration.

The Legislature hereby finds and declares the following:

(a) Coal mining has made and continues to make significant contributions to the economy of West Virginia. These contributions include the creation of quality jobs that pay high wages and provide good benefits; the consequent stimulation and support of mining contractors, suppliers of mining equipment and services, other mining-related industries and numerous providers of goods and services that are indirectly related to coal mining and dependent upon its existence and prosperity; the generation of significant severance and other tax revenues that support important economic development, infrastructure and education initiatives in mining communities and throughout the state; the support of civic, education and service groups in mining communities; and, in the case of surface mining operations, including mountaintop mining, the creation of much-needed flat land for economic development and recreational uses.

(b) The development and increasing prominence of surface mining operations, including mountaintop mining, has brought increasingly high levels of productivity, safety and efficiency to the state's mining industry, enabling the recovery of coal that could not otherwise be mined and marketed profitably, increasing the severance tax revenues and other economic benefits described in subsection (a) of this section and ensuring the competitiveness of the state's coal industry from a national and international perspective.

(c) Where implemented, surface mining operations, particularly mountaintop mining, tend to extract most, if not all, of the recoverable coal reserves in an accelerated fashion. For a state long dependent on the employment and revenue coal mining provides, this reality should be sobering and there is no place in which the comprehension of this reality is more crucial than the coalfields of West Virginia. Long dependent primarily on mining, this area must plan for a future without coal. The state and its subdivisions have a legitimate interest in securing that future.

(d) The coal industry and those related to the extraction of mineral resources benefit from the mining of our state's coal through mining practices which impact its citizens -- some in a negative way -- and through practices which will extract significant portions of coal reserves in an accelerated fashion. Those industries must therefore accept a greater responsibility to help address the long-term needs of the communities and citizens impacted by their activities.

(e) Once it becomes public knowledge that a permit is being sought, the marketability of property may change and the relative bargaining power of the parties may change with it. The potential for negative impact on those living in communities near surface mining operations may limit the options and bargaining power of the property owners.

(f) Surface mining operations, including mountaintop mining, present unique challenges to the coal mining industry and the state and its citizens, especially those living and working in

communities that rely heavily upon these methods of mining. This requires that these communities, in conjunction with county commissions, state, local, county and regional development authorities, landowners and civic, community and business groups and interested citizens, develop plans related to the communities' long-term economic viability.

(g) The Division of Energy, as the state agency charged with energy policy and development activities, shall take a more active role in the long-term economic development of communities in which these mining methods are prevalent and shall establish a formal process to assist property owners in the determination of the fair market value where the property owner and the coal company voluntarily enter into an agreement relating to the purchase and sale of such property.

§5B-2A-2. Application of article.

(a) The provisions of this article shall apply to all surface-mining operations, except:

(1) The surface operations and surface impacts incident to an underground coal mine; and

(2) Surface-mining operations of operators that: (A) Establish that their probable total annual coal production from all locations during any consecutive twelve-month period, either during the term of the permit or during the first five years after issuance of the permit, whichever period is shorter, will not exceed three hundred thousand tons, as determined pursuant to rules promulgated by the division; and (B) otherwise qualify for the small operator assistance program authorized under the federal Surface-Mining Control and Reclamation Act of 1977, as amended, and the federal regulations promulgated thereunder, as amended.

(b) The provisions of this article shall not apply: (1) To underground coal mining operations; or (2) to the extraction of minerals by underground mining methods or the surface impacts thereof.

(a) The office shall, no less frequently than quarterly, either consult with representatives of the department's Office of Mining and Reclamation or review the department's permit application database(s) to determine whether newly proposed surface mines or significant modifications to existing surface mining operations may present opportunities for mine operators to cooperate with local landowners and local governmental officials to mine and reclaim properties so as to develop community assets or secure developable land and infrastructure pursuant to this article.

(b) The provisions of this section shall apply to all surface mining permit applications granted after July 1, 2018.

WV Legislature

§5B-2A-8. Determining and developing needed community assets.

(a) The office shall determine the community assets that may be developed by the community, county, or region to foster its viability when surface mining operations are completed.

(b) Community assets to be identified pursuant to subsection (a) of this section may include the following:

(1) Water and wastewater services;

(2) Developable land for housing, commercial development, or other community purposes;

(3) Recreation facilities and opportunities; and

(4) Education facilities and opportunities.

(c) In determining the nature and extent of the needed community assets, the office shall consider at least the following:

(1) An evaluation of the future of the community once mining operations are completed;

(2) The prospects for the long-term viability of any asset developed under this section;

(3) The desirability of foregoing some or all of the asset development required by this section in lieu of the requirements of §5B-2A-9 of this code; and

(2) The names of the surface and mineral owners of the property to be mined pursuant to the permit; and

(3) A statement of the post-mining land use for all land which may be affected by the mining operations.

(d) In making a determination of the land and infrastructure needs in the general area of the mining operations, the office shall consider at least the following:

(1) The availability of developable land in the general area;

(2) The needs of the general area for developable land;

(3) The availability of infrastructure, including, but not limited to, access roads, water service, wastewater service, and other utilities;

(4) The amount of land to be mined and the amount of valley to be filled;

(6) The availability of federal, state, and local grants and low-interest loans to finance all or a portion of the acquisition and construction of the identified land and infrastructure needs of the general area.

(e) In making a determination of the land and infrastructure needs in the general area of the surface mining operations, the office shall give significant weight to developable land on or near existing or planned multilane highways.

(f) The office may secure developable land and infrastructure for a Development Office or county through the preparation of a master land use plan for inclusion into a reclamation

plan prepared pursuant to the provisions of §22-3-10 of this code. No provision of this section may be construed to modify requirements of §22-3-1 et seq. of this code.

(1) The county commission or other governing body for each county in which there are surface mining operations that are subject to this article shall determine land and infrastructure needs within their jurisdictions through the development of a master land use plan which incorporates post-mining land use needs, including, but not limited to, renewable and alternative energy uses, residential uses, highway uses, industrial uses, commercial uses, agricultural uses, public facility uses, or recreational facility uses. A county commission or other governing body of a county may designate a local, county, or regional development or redevelopment authority to assist in the preparation of a master land use plan. A county commission or other governing body of a county may adopt a master land use plan developed after July 1, 2009, only after a reasonable public comment period.

(2) Upon the request of a county or designated development or redevelopment authority, the office shall assist the county or development or redevelopment authority with the development of a master land use plan.

(3)(A) The Department of Environmental Protection and the Office of Coalfield Community Development shall review master land use plans existing as of July 1, 2009. The office shall approve the plan if it complies with the requirements of this article and the rules promulgated pursuant to this article.

(C) The office shall review a master land use plan approved under this section every three years. No later than six months before the review of a master land use plan, the county or designated development or redevelopment authority shall submit an updated master land use plan to the department and the office for review. The county may submit its updated master land use plan only after a reasonable public comment period. The office shall approve the master land use plan if the updated plan complies with the requirements of this article and the rules promulgated pursuant to this article.

(D) If the office does not approve a master land use plan, the county or designated development or redevelopment authority shall submit a supplemental master land use plan to the office for approval.

(4) The required infrastructure component standards needed to accomplish the designated post-mining land uses identified in a master land use plan shall be developed by the county or its designated development or redevelopment authority. These standards must be in place

before the respective county or development or redevelopment authority can accept ownership of property donated pursuant to a master land use plan. Acceptance of ownership of such property by a county or development or redevelopment authority may not occur unless it is determined that:

- (A) The property use is compatible with adjacent land uses;
- (B) The use satisfies the relevant county or development or redevelopment authority's anticipated need and market use;
- (C) The property has in place necessary infrastructure components needed to achieve the anticipated use;
- (D) The use is supported by all other appropriate public agencies;
- (E) The property is eligible for bond release in accordance with §22-3-23 of this code; and
- (F) The use is feasible.

Required infrastructure component standards require approval of the relevant county commission, commissions, or other county governing body before such standards are accepted. County commission or other county governing body approval may be rendered only after a reasonable public comment period.

(5) The provisions of this subsection shall not take effect until legislative rules are promulgated pursuant to this code governing bond releases which assure sound future maintenance by the local or regional economic development, redevelopment, or planning agencies.

§5B-2A-10. Action report; annual update.

(a) Based upon the information developed under sections eight and nine of this article, the office shall prepare an action report which shall make recommendations for achieving economic development initiatives, including identifying sources of potential funding.

(b) The office shall prepare an annual status update of the action report which shall describe accomplishments and prospects for continued economic development.

§5B-2A-11. Land acquisitions.

The office shall establish a procedure to assist property owners who desire voluntarily to sell their property to the operator or any person, firm or corporation directly or indirectly affiliated with the operator. The procedure developed shall be subject to the following:

(1) The procedure only shall apply if all the following conditions are met:

(A) The operator or any person, firm or corporation directly or indirectly affiliated with the operator, makes an offer in writing to purchase the property stating all the terms and conditions of the proposed purchase;

(B) The property to be purchased is located within one thousand feet of property which actually is or will be mined; and

(C) The structures are actually being used for commercial purposes or are occupied residences situate on the property to be purchased;

(2) Once a permit application has been filed, the operator shall notify the office of any intended property acquisitions to which this section applies;

(3) The office shall cause notice to be given to potential sellers of the procedure established by this section, but shall provide no other assistance unless requested by the potential seller;

(4) If requested by the potential seller, the office shall make a determination as to whether the value of the property intended to be acquired is diminished by ongoing or intended mining operations and that the purchase price offered by the purchaser is less than the value the property would have had prior to any diminution of value. The office only shall provide assistance if it determines that the value of such property is diminished and that the offer made by the operator is less than the value the property would have had prior to any diminution of value; and

(5) If the office determines that the value of such property is diminished and that the offer made by the operator is less than the value the property would have had prior to any diminution of value, then the office shall establish the value of such property prior to any diminution and shall certify the same to the parties.

§5B-2A-12. Rulemaking.

The office shall propose rules for legislative approval in accordance with article three, chapter twenty-nine-a of this code to establish, implement and enforce the provisions of this article, which rules shall include, but not be limited to:

- (1) The development of standards for establishing the value of property by the office; and
- (2) Criteria for the development of a master plan by local, county, regional or redevelopment authorities which coordinates the permitting and reclamation requirements of the Department of Environmental Protection with these authorities.

WV Legislature

§5B-2E-2. Legislative findings.

The Legislature finds and declares that the general welfare and material well-being of the citizens of the state depend, in large measure, upon the development of tourism development projects in the state and that it is in the best interest of the state to induce the creation of new, or the expansion of existing, tourism development projects within the state in order to advance the public purposes of relieving unemployment by preserving and creating jobs and by preserving and creating new and greater sources of revenues for the support of public services provided by the state; and that the inducement for the creation or expansion of tourism development projects should be in the form of a tax credit to be applied to consumers sales and service taxes collected on the gross receipts generated directly from the operations of the new or expanded tourism development projects, in lieu of tax credits on income that are largely deferred for a number of years after start up of a major tourism development project; and all of which new or expanded tourism developments are of paramount importance to the state and its economy and for the state's contribution to the national economy.

(b) The maximum amount of credit allowable in this article is equal to twenty-five percent of the approved company's approved costs as provided in the agreement: *Provided*, That, if the tourism development expansion project site is located within the permit area or an adjacent area of a surface mining operation, as these terms are defined in section three, article three, chapter twenty-two of this code, from which all coal has been or will be extracted prior to the commencement of the tourism development project; or the tourism development expansion project site is a structure that is listed individually in the national register of historic places or is located in a national register historic district and certified by the state historic preservation officer as contributing to the historic significance of the district; or the tourism development project site is located on or with 5 miles of a recreational property owned or leased by the state or federal government and when the project is located on property owned or leased by the state or federal government, the project has received prior approval from the appropriate state or federal agency, the maximum amount of credit allowable is equal to thirty-five percent of the approved company's approved costs as provided in the agreement.

This election may be made in the first consumers sales and service tax return filed by the approved company following the date the project is opened to the public. Once made, the election cannot be revoked. If any credit remains after application of this initial 10-year period, the approved company may request an additional 15 year credit application period from the Department. subsection may be used as a credit against taxes required to be remitted on the approved company's monthly consumers sales and service tax returns that are filed pursuant to section sixteen, article fifteen, chapter eleven of this code. The approved company shall claim the credit by reducing the amount of consumers sales and service tax required to be remitted with its monthly consumers sales and service tax returns by the amount of its aggregate annual credit allowance until such time as the full current year annual credit allowance has been claimed. Once the total credit claimed for the tax year equals the approved company's aggregate annual credit allowance no further reductions to its monthly consumers sales and service tax returns will be permitted.

(e) Notwithstanding any other provision of this code, an approved company may elect not to utilize the tax credit awarded in this article for any reason whatsoever, including, but not limited to, utilizing other tax credits permitted in this code, after the project is completed and placed in use but prior to making an election pursuant to subsection (c) of this section. (E) The employer having obtained qualification as an eligible company under this section for

the year in which the new job is filled is not required to raise wages of the employees currently employed in the new jobs upon which the initial qualification as an eligible company under this section was based by reason of the cost-of-living adjustment for new jobs filled in subsequent years provided the employer continues to provide healthcare.

§5B-2K-1. Short title.

This article shall be known as the Coalfield Grant Facilitation Act of 2022.

WV Legislature

§5B-2K-2. Legislative Findings.

The Legislature finds that the historical coal field communities of this state that were once thriving and vital parts of the state have seen decades of decline as changes in coal mining technologies and mining practices and the decline in the market for coal have resulted in a steady decline in the populations and economic vitality of the coal mining regions of our state; and every effort made to revitalize these areas is an important and necessary component of the success and advancement of the economy of this state.

Many funding initiatives available to these areas in the form of matching grants from federal and private sources have become a significant and important opportunity for access to capital to initiate revitalization, but limitations of funds to match grants and having the resources to apply for and facilitate receipt of these grants has encumbered the utilization of these resources.

The Legislature, by enactment of this article, intends to initiate mechanisms to facilitate the access to such capital, by establishing a commission to administer state funds to provide to eligible local entities the required local matching portion for certain grants; and to facilitate assistance to these local entities by providing access to grant writing expertise and support by utilizing our state university and colleges to assist in the development of successful grant writing resources for local entities to maximize their success in rebuilding their communities.

Part I. General

§5B-2L-1. Short title.

This article shall be known as the BUILD WV Act.

WV Legislature

§5B-2L-2. Legislative findings and purpose.

(a) The Legislature hereby finds that reasonably priced residential housing for graduate, post-graduate and professional job holders, technical workers, and entrepreneurs for targeted businesses in key geographical regions of this state is an essential component of West Virginia's comprehensive economic development. Highly meritorious measures have been undertaken under both federal law and state law for the construction of low-income housing, direct loan support, rent assistance, supportive housing for elderly citizens and citizens with disabilities, public housing programs, business location incentives and incentives for capital formation, and entrepreneurial innovation in economically depressed areas. The Legislature finds that key geographic areas of this state are on the verge of a burgeoning expansion for economic development, accompanied by unprecedented technical innovation, creation of expansive new businesses in unexplored commercial and industrial markets, with individual opportunities for employment, entrepreneurship, personal success, and personal development for the people of West Virginia.

(b) The Legislature finds that a significant constraint upon this expansion is the lack of housing for graduate, post-graduate, professional, and technical personnel whose participation is vital to the economic success of West Virginia, and to the economic, cultural, and social betterment of West Virginia. Support for low-income housing and the other assistance, enumerated above, has the firm support of the Legislature. However, support for middle income housing and middle market housing needs in these key geographic areas is lacking. Such support is crucial for expansion of technical, industrial, and commercial markets expected for West Virginia.

(c) Therefore, the Legislature hereby establishes the BUILD WV Act, with the intent to remove this constraint and provide the stimuli and incentives necessary for these developments to go forward.

(b) *Pass-through entities.* -

(1) The annual property value adjustment tax credit allowed under this article for the year shall flow through to the equity owners of the pass-through entity in the same manner as distributive share of income flows through to the equity owners.

(2) *Personal income tax — application of annual property value adjustment tax credit against personal income tax on income from pass-through entities.* - The property value adjustment tax credit authorized by this article may be applied against the tax imposed under §11-21-1 *et seq.* of this code, on flow-through income of an individual partner, owner, interest holder or S Corporation shareholder, which is directly and solely derived from and limited to the net income of the flow-through entity that is an eligible taxpayer that has developed certified project property. If annual property value adjustment tax credit allowed under this article exceeds the amount of personal income tax of a particular owner, interest holder, partner or S Corporation shareholder or other owner of a flow-through entity that is an approved company, subject to offset by the property value adjustment tax credit under this article in any taxable year, the particular owner, interest holder, partner, S Corporation shareholder, or other owner of the flow-through entity may claim, for that taxable year, the excess amount as a refundable tax credit. The \$100,000 limitation is determined at the flow-through entity level and applies as the total aggregate limit on all refundable credit available to all partners, owners, interest holders, or S Corporation shareholders that receive a distributive share of flow through income from the flow-through entity. The refundable credit amount shall be divided and distributed among the individual partners, owners, interest holders, or S Corporation shareholders, in the same manner and in the same proportions as the distributive share of income flows through to the equity owners: *Provided*, That in the case of multiple approved companies that have developed project property, the \$100,000 limitation applies on a per project basis, as specified herein.

(3) *Corporation net income tax — application of annual property value adjustment tax credit against corporation net income tax on income from pass-through entities.* - The property value adjustment tax credit authorized by this article may be applied against the tax imposed under §11-24-1 *et seq.* of this code, on flow-through income of a C corporation that is a partner, owner, interest holder, or S Corporation shareholder, which is directly and solely

derived from and limited to the net income of the flow-through entity that is the eligible taxpayer that developed certified project property. If annual property value adjustment tax credit allowed under this article exceeds the amount of corporation net income tax of a particular owner, interest holder, partner, S Corporation shareholder, or other owner of a flow-through entity that is an approved company, subject to offset by the property value adjustment tax credit under this article in any taxable year, the particular owner, interest holder, partner, S Corporation shareholder, or other owner of the flow-through entity may claim, for that taxable year, the excess amount as a refundable tax credit. The \$100,000 limitation is determined at the flow-through entity level and applies as the total aggregate limit on all refundable credit available to all partners, owners, interest holders or S Corporation shareholders that receive a distributive share of flow-through income from the flow-through entity. The refundable credit amount shall be divided and distributed among the partners, owners, interest holders or S Corporation shareholders, in the same manner and in the same proportions as the distributive share of income flows through to the equity owners: *Provided*, That in the case of multiple eligible taxpayers that have developed project property, the \$100,000 limitation applies on a per project basis, as specified herein.

(c) The property value adjustment tax credit shall not apply against the ad valorem property tax. The property value adjustment tax credit shall not apply against any withholding tax or payroll tax of any taxpayer or employer.

(d) *Annual schedule.* - For purposes of asserting the property value adjustment tax credit allowed under this article against tax, the taxpayer must prepare and file an annual schedule showing the amount of tax paid for the taxable year and the amount of credit allowed under this article, and such other information as the Tax Commissioner may require. The annual schedule shall set forth the information and be in the form prescribed by the Tax Commissioner.

§5B-2L-12. Property value adjustment tax credit entitlement is retained by eligible taxpayers that have developed project property, transfer of credit to transferees of project property is prohibited.

(a) *Transfer or sale of assets.* —

Credit entitlement shall not be transferred to the transferee of project property.

(b) *Stock purchases.* - Where a corporation which is an eligible taxpayer entitled to the property value adjustment tax credit under this article is purchased through a stock purchase by a new owner, where such corporation remains a legal entity so as to retain its corporate identity, the entitlement of that corporation to the property value adjustment tax credit allowed under this article will not be affected by the ownership change: *Provided*, That the corporation otherwise remains in compliance with the requirements of this article for entitlement to the property value adjustment tax credit.

(c) *Mergers.* —

(1) Where a corporation or other entity that is an eligible taxpayer entitled to the property value adjustment tax credit under this article is merged with another corporation or entity, the surviving corporation or entity is entitled to the property value adjustment tax credit to which the predecessor eligible taxpayer was originally entitled: *Provided*, That the surviving corporation or entity otherwise complies with the provisions of this article.

(2) The amount of property value adjustment tax credit available in any taxable year during which a merger occurs shall be apportioned between the predecessor eligible taxpayer and the successor eligible taxpayer based on the number of days during the taxable year that each owned the transferred certified BUILD WV project business assets.

(d) No provision of this section or of this article may be construed to allow sales, assignment, or other transfers of the property value adjustment tax credit allowed under this article. The property value adjustment tax credit allowed under this article can be redesignated as useable by a taxpayer or entity other than the original entity entitled to the credit, only in circumstances where there is a valid successorship as described under this section.

§5B-2L-13. Credit recapture; interest; penalties; additions to tax; statute of limitations.

(a) If it appears upon audit or otherwise that any person or entity has taken the property value adjustment tax credit against tax and was not entitled to take the credit, then the credit improperly taken shall be recaptured. Amended returns shall be filed for any tax year for which the credit was improperly taken. Any additional taxes due under §11-21-1 *et seq.* or §11-24-1 *et seq.*, or any other provision of this code shall be remitted with the amended return or returns filed with the Tax Commissioner, along with interest, as provided in §11-10-1 *et seq.* of this code and such other penalties and additions to tax as may be applicable pursuant to the provisions of §11-10-1 *et seq.* of this code.

(b) Notwithstanding the provisions of §11-10-1 *et seq.* of this code to the contrary, penalties and additions to tax imposed under that article may be waived at the discretion of the Tax Commissioner: Provided, That interest is not subject to waiver.

(c) Notwithstanding the provisions of §11-10-1 *et seq.* of this code to the contrary, the statute of limitations for the issuance of an assessment of tax by the Tax Commissioner is five years from the date of filing of any tax return on which the property value adjustment tax credit was taken or five years from the date of payment of any tax liability calculated pursuant to the assertion of the property value adjustment tax credit allowed under this article, or five years from the date of payment of any refundable tax credit calculated pursuant to the assertion of the property value adjustment tax credit allowed under this article, whichever is later.

WV Legislature

§5B-2N-1. Short title.

This article shall be known and cited as the Grid Stabilization and Security Act.

WV Legislature

§5B-2N-2. Legislative findings; declaration of public policy.

(a) The Legislature finds that:

(1) The advent and advancement of new and existing technologies and drilling practices have created the opportunity for efficient development of natural gas in West Virginia, including opportunities for the production of electricity;

(2) Production of electricity utilizing natural gas produced in West Virginia is highly underdeveloped in comparison to nearby states with which West Virginia competes for economically beneficial projects. Natural gas electric generation projects have been undermined by existing regulatory requirements and related time delays;

(3) In developing regulatory actions and identifying appropriate approaches to encourage development of natural gas electric generation projects, agencies should attempt to promote coordination, simplification, and harmonization. Agencies should also seek to identify appropriate means to achieve regulatory goals that are designed to promote innovation and enhance West Virginia's competitiveness with surrounding states;

(4) Agencies should review their existing legislative and procedural rules to determine whether any such rules should be modified, streamlined, expanded, or repealed to make the agency's regulatory program more effective or less burdensome in achieving the regulatory objectives related to natural gas electric generation projects. Agencies should also evaluate the data that they have to determine what information might be useful to prompt permitting and approving natural gas generated electricity; and

(5) The West Virginia Department of Economic Development, established in §5B-2-1 *et seq.* of this code, is responsible for implementing this Grid Stabilization and Security Act and providing as much assistance as possible to grow and sustain the natural gas electric generation segment of the economy.

(b) The Legislature declares that facilitating the development of business activity directly and indirectly related to natural gas electric generation development, transportation, storage, and use serves the public interest of the citizens of this state by promoting economic development, improving economic opportunities for the citizens of this state, and providing additional opportunities to stabilize the price of electricity while increasing its reliability and availability.

§5B-2N-2a. Creating the Electric Grid Stabilization and Security Fund.

(a) The Electric Grid Stabilization and Security Fund is hereby created. The fund shall be administered by the Department of Commerce and shall consist of all moneys made available for the purposes and from the sources set forth in this section of the code.

(b) The fund consists of moneys received from the following sources:

(2) All appropriations provided by the Legislature;

(3) Any moneys available from external sources; and

(4) All interest and other income earned from investment of moneys in the fund.

(c) The Department of Commerce shall use moneys in the fund to provide support for electric grid stabilization for regulated utilities and grid security, including development, efficiency, and environmental upgrades, but not decommissioning and replacement of existing facilities; maintenance of utility owned and operated coal and natural gas electric generation, regardless of unit or plant ownership by different regulatory jurisdictions; and transmission resources which solely serve West Virginia rate payers.

(d) Any balance, including accrued interest and any other returns, in the Electric Grid Stabilization and Security Fund at the end of each fiscal year may not expire to the General Revenue Fund but remain in the fund and be expended for the purposes provided by this section.

(e) Fund balances may be invested with the state's Consolidated Investment Fund. Earnings on the investments shall be used solely for the purposes defined in §5B-2-16(c) of this code.

(f) In order to effectuate the purposes of this section, the Department of Commerce may promulgate legislative rules, including emergency rules, in accordance with §29A-3-1 *et seq.* of this code.

- (2) Geographic locations near existing electric transmission infrastructure capable of transmitting the generated electricity to wholesale markets.
- (3) Geographic locations that fulfill the air quality conditions imposed by the Division of Air Quality of the West Virginia Department of Environmental Protection for one or more natural gas electric generation facilities; and
- (4) Geographic locations that can demonstrate that allowable emission increases from one or more natural gas electric generation facilities, in conjunction with all other applicable emission increases or reductions (including secondary emissions), would not cause or contribute to air pollution in violation of:
 - (A) Any national or West Virginia ambient air quality standard in any air quality control region; or
 - (B) Any applicable maximum allowable increase over the baseline concentration in any area.

§5B-2N-4. Designation of sites suitable for natural gas electric generation projects.

WV Legislature

§5B-11-1. Legislative findings.

The Legislature finds that the Advanced Energy and Economic Corridor, once known as Tug-Ohio-Levisa-Sandy Improvement Association (TOLSIA) and the King Coal Highway, which runs through the counties of McDowell, Mercer, Mingo, Wayne, and Wyoming has undergone significant challenges owing to widespread changes in the national and global economies; and every effort should be made to assist the transformation of these regional economies by providing guidance to local governments, businesses, and industries to maximize economic development and diversification of those economies. As part of the National Highway System's I-73/74 corridor from northern Michigan to eastern South Carolina, the Advanced Energy and Economic Corridor, will not only foster greater transportation efficiencies, but will also provide vital connectivity to burgeoning markets, resulting in both job creation and economic expansion in southern West Virginia.

(a) Upon making a capital investment in a growth fund, a growth investor shall have an earned and vested right to credits against such entity's state tax liability that may be utilized on each credit allowance date of such capital investment in an amount equal to the applicable percentage for such credit allowance date multiplied by the purchase price paid to the growth fund for the capital investment. The amount of the credit claimed by a growth investor or its allocatee shall not exceed the amount of such entity's state tax liability for the tax year for which the credit is claimed. No credit may be claimed under this article against a growth investor's state tax liability for any investor's tax year that begins prior to calendar year 2029. Any amount of credit that a growth investor or its allocatee is prohibited from claiming in a tax year as a result of this section may be carried forward for use in any of the five subsequent tax years, but shall not be carried back to prior tax years. It is the intent of this article that a growth investor claiming a credit under this article is not required to pay any additional tax that may arise as a result of claiming such credit.

(b) No credit claimed under this section shall be refundable or saleable on the open market. Credits earned by or allocated to a partnership, limited liability company, or S corporation may be allocated to the partners, members, or shareholders of such entity for their use in accordance with the provisions of any agreement among such partners, members, or shareholders, and any such entity shall notify the department of the names of the entities that are eligible to utilize such credit. - (1) The growth fund does not invest 100 percent of its capital investment authority in qualified investments in this state within three years of the initial credit allowance date;
- (2) The growth fund fails to maintain qualified investments equal to 100 percent of its capital investment authority from the third anniversary until the sixth anniversary of the credit allowance date. For the purposes of this subsection, a qualified investment is considered maintained even if the qualified investment was sold or repaid so long as the growth fund reinvests an amount equal to the capital returned or recovered or repaid by the growth fund from the original investment, exclusive of any profits realized, in other qualified investments in this state within 12 months of receipt of such capital. Amounts received periodically by a growth fund shall be treated as maintained in qualified investments if the amounts are reinvested in one or more qualified investments by the end of the following calendar year. A growth fund shall not be required to reinvest capital returned from qualified investments after the fifth anniversary of the credit allowance date, and such qualified investments shall be considered maintained by the growth fund through the sixth anniversary of the credit

allowance date;

(3) Prior to the earlier of exiting the program in accordance with this article or 30 days after the sixth anniversary of the credit allowance date, the growth fund makes a distribution or payment that results in the growth fund having less than 100 percent of its capital investment authority invested in qualified investments in the state or held in cash or other marketable securities; or

(4) The growth fund violates the provisions of §5B-12-6 of this code, in which case the department may recapture an amount equal to the amount of the growth fund's capital investment authority found to be in violation of such provisions.

(d) Recaptured credits and related capital investment authority shall revert to the department and shall be reissued pro rata to growth fund applicants whose capital investment allocations were reduced in accordance with the application process provided under §5B-12-3(e) of this code.

(e) No recapture shall occur until the growth fund has been given notice of noncompliance and afforded six months from the date of such notice to cure the noncompliance.

(f) A growth fund, before making a qualified investment, may request from the department a written opinion as to whether the business in which it proposes to invest is an eligible business. The department, no later than 15 business days after the date of receipt of such request, shall notify the growth fund of its determination. If the department fails to notify the growth fund of its determination by the 20th business day, the business in which the growth fund proposes to invest shall be deemed an eligible business.

§5B-12-6. Investment prohibitions

No eligible business that receives a qualified investment under the provisions of this article, or any affiliates of such eligible business, shall directly or indirectly:

(1) Own or have the right to acquire an ownership interest in a growth fund or member or affiliate of a growth fund including, but not limited to, a holder of a capital investment issued by a growth fund; or

(2) Loan to or invest in a growth fund or any member or affiliate of a growth fund including, but not limited to, a holder of capital investment issued by a growth fund, where the proceeds of such loan or investment are directly or indirectly used to fund or refinance the purchase of capital investments under this article.

§5B-12-7. Annual reporting.

(a) Growth funds shall submit a report to the department by June 30 of each calendar year during the compliance period. The report following the third anniversary of the initial credit allowance date shall provide documentation as to the investment of 100 percent of the purchase price of such capital investment in qualified investments. Unless previously reported pursuant to this subsection, such reports shall also include:

- (5) The average salary of positions described in subdivision (4) of this subsection; and
- (6) Such other information as required by the department.

- (1) The number of jobs created and jobs retained as a result of qualified investments;
- (2) The average annual salary of positions described in subdivision (1) of this subsection; and
- (3) Such other information as required by the department.

(c) On or following the sixth anniversary of the credit allowance date, a growth fund may apply to the department to exit the program and no longer be subject to the regulation hereunder. The department shall respond to the exit application within 15 days of receipt. In evaluating the exit application, the fact that no credits have been recaptured and that the growth fund has not received a notice of recapture that has not been cured pursuant to §5B-12-5(e) of this code shall be sufficient evidence to prove that the growth fund is eligible for exit. The department shall not unreasonably deny an exit application submitted under this section. If an exit application is denied, the notice shall include the reasons for the determination.
