WEST VIRGINIA CODE: §7-17-7

§7-17-7. Resident requirement of county fire board members; municipality location.

All members of the county fire board shall be residents of the county in which the county fire board is intended to operate. If a county boundary line divides a municipality's city limits, the area of the municipality in which the majority of the municipality's population resides determines the county in which the municipality is located for this purpose.
