ENROLLED
COMMITTEE SUBSTITUTE
FOR
House Bill No. 709
(By Mrs. Withrow)

[Originating in the House Committee on Health and Welfare]

[Passed March 21, 1973; in effect ninety days from passage.]

AN ACT to amend and reenact section four-a, article three, chapter sixteen of the code of West Virginia, one thousand nine hundred thirty-one, as amended, relating to compulsory testing for tuberculosis of school children and compulsory X rays or approved tuberculin skin tests for school personnel.

Be it enacted by the Legislature of West Virginia:

That section four-a, article three, chapter sixteen of the code of West Virginia, one thousand nine hundred thirty-one, as amended, be amended and reenacted to read as follows:

ARTICLE 3. PREVENTION AND CONTROL OF COMMUNICABLE, AND OTHER INFECTIONOUS DISEASES.

§16-3-4a. Compulsory testing for tuberculosis of school children and school personnel; X rays required for reactors; suspension from school or employment for pupils and personnel found to have tuberculosis in a communicable stage.

1 All kindergarten pupils and all first grade pupils who have
2 not had an approved tuberculin skin test in kindergarten and all
3 students transferring from a school located outside this state
shall furnish a certificate from a licensed physician stating
that a tuberculin skin test approved by the director of the
department of health has been made within four months prior
to the beginning of the school year, unless such pupil has
moved to this state from another state less than four months
prior to starting the school year, in which event such pupil
shall have such test as soon in advance of the start of the
school as is reasonable, or if the school year has already
started, the pupil shall take such test within one month of the
time he enters school. Test results must be recorded on the
certificate. Positive reactors to the skin test must be immedi-
ately x-rayed, and receive annual X rays thereafter, or at
more frequent intervals if medically indicated. Pupils found
to have tuberculosis in a communicable stage will not be
allowed to attend school until their disease has been arrested
and is no longer communicable.

All school personnel shall have a chest X-ray or an approved
tuberculin skin test once every two years. Positive reactors
to the skin test are to be immediately x-rayed and re-x-rayed
annually or at more frequent intervals if medically indicated.
Reactors who are annually x-rayed will not be required to
have an annual skin test. School personnel found to have
tuberculosis in a communicable stage shall have their em-
ployment discontinued or suspended until their disease has
been arrested and is no longer communicable. School per-
sonnel who have not had the required examination will be
suspended from employment until reports of examination are
confirmed.
The Joint Committee on Enrolled Bills hereby certifies that the foregoing bill is correctly enrolled.
