## **ARTICLE 21A. CONSERVATION DISTRICTS.**

### **§19-21A-1. Short title.**

1 This article may be known and cited as the Conservation Districts Law of West Virginia.

### **§19-21A-2. Legislative determinations and declaration of policy.**

1 It is hereby declared, as a matter of legislative determination:

2 (a) That West Virginia has a rich history of farming and using natural resources. The farms,  
3 forests, soil, and water resources are among the basic assets of the state and conservation of  
4 these resources is vital to the maintenance and future of the state and its citizens. However,  
5 improper land use practices have led to unnecessary soil erosion and water degradation.

6 (b) There is a continuing need for the implementation of conservation practices, whether  
7 urban, suburban, or rural, that maintain, promote, control, and prevent soil erosion, prevent  
8 floodwater and sediment damage, and further the conservation, development, use, disposal, and  
9 quality of water, thereby preserving natural resources, controlling floods, preventing impairment  
10 of dams and reservoirs, assisting in maintaining the navigability of rivers and harbors, preserving

11 wildlife, protecting the tax base, protecting public lands, and promoting the health, safety, and  
12 general welfare of the people of this state.

13 (c) Adopting sound conservation policies and practices is an investment in West Virginia's  
14 Natural Resources and is a foundation for profitable, productive, and healthy ecosystems that are  
15 resilient and better able to withstand current and future environmental challenges.

16 (d) In recognition of the ever-increasing demands on West Virginia's soil and water  
17 resources, it is declared the policy of the state that the State Conservation Committee and the  
18 State's Conservation Districts, in cooperation with other state and federal agencies, political  
19 subdivisions, nongovernmental organizations, private landowners, and others, work to  
20 recommend and implement programs and policies that improve soil health and water quality.

21 (e) This article contemplates that the cost of operating conservation districts will be  
22 provided by donations, gifts, contributions, grants, and appropriations, in money, services,  
23 materials, or otherwise, from the United States or any of its agencies, from the State of West  
24 Virginia or from other sources, with the understanding that the owners or occupiers of the land  
25 bear the responsibility of implementing practices to alleviate soil erosion and/or improve water  
26 quality on their lands and will contribute funds, labor, materials, and equipment to aid in carrying  
27 out such measures.
